

# Ventilating Fan Specifications

Model:FV-15AUL1

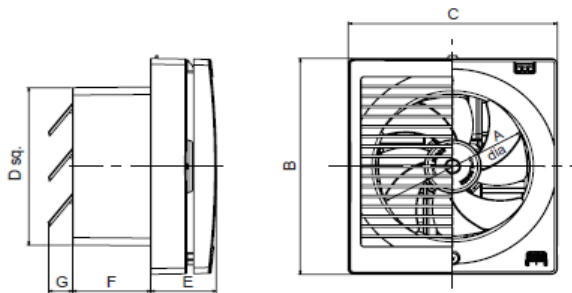

## ■ Specifications

			220V 50Hz
			Exhaust
Air Volume	m <sup>3</sup> /h	±10%	255
Power Consumption	W	±12%	12.5
Ampere	A	±12%	0.058
Noise	dB (A)	+3/-7	36.0
*Rotation Speed	min <sup>-1</sup>		1450

\*Rotation Speed data are reference only.

- |                                |   |
|--------------------------------|---|
| 1. Power Rating -----          | 220V~ 50Hz                              |
| 2. Motor Type -----            | Capacitor start and run induction motor |
| 3. Blade Type -----            | Propeller fan                           |
| 4. Ambient Temperature -----   | -10 to 40 deg.C                         |
| 5. Insulation Resistance ----- | More than 10 mega ohm                   |
| 6. Electrical Strength -----   | 1500V~ 1 minute                         |
| 7. Net Weight -----            | 1.2 Kg                                  |
| 8. Insulation Class -----      | Class E                                 |
| 9. Type of insulation -----    | Functional insulation                   |

## ■ Drawing with dimensions

Unit : mm

A	B	C	D	E	F	G
180	257	233	190	73	88	(27)
