

Panasonic
AIR CONDITIONING

Whole Home Solutions

Ducted & Multi Room Air Conditioning

2023/24

QUALITY AIR FOR LIFE

Control Solutions

Easy-to-use, with multiple energy saving functions at your fingertips.

Available on Ducted and Mini VRF options, not available on Multi Systems.

CONEX

(CZ-RTC6 / CZ-RTC6BL / CZ-RTC6BLW)

Simple and sophisticated design in-and-out

User friendly interface with stylish design measuring just 86 x 86 mm, CONEX is an extremely compact remote controller which looks great in any room.

Easy control and access for end users, installers, and service partners with just one remote

User-friendly day-to-day operation for end users, simplified set up for installers, and convenient after-sales service access for service partners - all with one remote control.

Deluxe Wired Remote Controller

Large 3.5" full-dot LCD with white LED backlight

Characters and icons are clearly displayed for perfect visibility. With the white LED backlight, you can now change the temperature during the night without even turning on the light.

Stylish, easy-to-use touch key design

The elegant, flat design features large touch keys in a simple layout enabling easy, intuitive operation.

CONEX/CONEX Zone Controller

Individual Comfort and Energy Saving
Airflow Volume Control

The damper opening can be controlled with the CFC app. Adjust the air volume conveniently according to your daily life.

Auto-optimised Comfort for Your Lifestyle
Weekly timer

Able to set 6 timers/day. Realise optimal control day & night for your lifestyle with timers.

Purifies Your Room with nanoe™ X
24hr Clean air

When you go out, clean the air with the nanoe™ mode. Pre-cool the living zone according to the time you return home.

Damper and Damper Motor (locally supplied)
/Transformer (locally supplied)

Zone Remote Controller

Spec & dimensions

Model No.	CZ-RTC6Z
Dimensions	(H) 86 mm x (W) 86 mm x (D) 25 mm
Weight	0.10 kg
Temperature / Humidity range	0°C to 40°C / 20% to 80% (No condensation) • Indoor use only.
Power Source	DC16 V (supplied from indoor unit)
Wireless LAN standard	IEEE 802.11 b/g/n
Frequency range	2.4 GHz band
Encryption	WPA2-PSK (TKIP/AES)
OS version on the mobile device for CFC	iOS: 9.0 or later Android™: 5.0 or later

Zone Control Box

Spec & dimensions

Model No.	CZ-CAPZ1S/CZ-CAPZ1M
Dimensions	(H) 250 mm x (W) 342 mm x (D)70 mm
Weight	1.9 kg

Remote Temperature Sensor

Spec & dimensions

Model No.	CZ-CSRC3
Dimensions	(H) 120mm X (W) 70mm X (D) 17mm
Weight	70g
Temperature/Humidity range	0°C to 40°C / 20% to 80% (No condensation) Indoor use only.

Usable indoor units

Zone Controller can be connected with 3.6 kW to 22.4 kW Ducted (PE3 and PF3) Indoors and VRF Ducted units (M1, E1, E2, E1R, F2, F3 and Z1).

*Connectable to selected Panasonic ducted models only, please consult Panasonic for more details.

Series	PE3	PF3	MM1	ME1	ME2	ME1R	MF2	MF3	MZ1
Capacity	6.0 kW-22.4 kW	3.6 kW-14.0 kW	2.2 kW-5.6 kW	7.3 kW-14.0 kW	18.0 kW-28.0 kW	9.0 kW-16.0 kW	2.2 kW-16.0 kW		2.2 kW-7.3 kW

Panasonic Comfort Cloud features

Voice Control

Control air conditioning units by voice command intuitively connecting to smart speaker.*

Multiple User

The Panasonic Comfort Cloud App allows multiuser access control. Restrict user access to specific units.

From 1 to 200 units

User can control up to 200 indoor units. 10 different sites, with up to 20 units / groups per site.

Energy Monitor

See the estimated power consumption and compare with other periods to see how energy bill can be reduced even more.**

Easy Scheduling

Complex weekly scheduling made simple. Not only for one units, but across multiple sites and from a smartphone.

Error Codes

Error code notification through the App, provides early notification and allows for faster repair.

Application Examples

Centralised control from reception.

Multiple location control for small business.

System configuration

Network Adaptor

CZ-TACG1 CZ-CAPWFC1

Connection Diagram

Indoor Unit

In conformity with IEEE 802.11

CZ-TACG1: For products for small sized project. (Page 40-41)
 CZ-CAPWFC1: Available for all types of VRF and PAC indoor unit.

WLAN Smart Adaptor specification

	CZ-TACG1	CZ-CAPWFC1
Input Voltage	DC 1.2V (Supplied from indoor unit)	
Power Consumption	Maximum 0.66W	Maximum 2.4W
Size [H x W x D]	66 x 36 x 12mm	120 x 70 x 25mm
Weight	Approx. 85g	190g (including communications lines)
Interface	Wireless LAN	
Wireless LAN Standard	IEEE 802.11 b/g/n	
Frequency range	2.4GHz band	
Encryption	WPA2-PSK(TKIP/AES)	
Operation range	0-55°C, 20 - 80RH%	

Comfort Cloud App

Compatible Device and Browsers

1. IOS 9.0 or above
2. Android 4.4 or above

*1 Time of release in Quarter Three 2019.
 CZ-TACG1 or CZ-CAPWFC1 Network Adaptor required per unit.
 Requires an Internet connection and the App downloaded from the App Store or GooglePlay Store on your smartphone or tablet with the latest Operating System available.
 To use Amazon Alexa to control your air conditioner, you will need an Amazon Echo device.
 To use Google Assistant to control your air conditioner, you will need a Google Assistant device.

 **2 Function available depending on the model.

Ducted System

Advantages

- Discrete and quiet
- Up to 8 rooms off one outdoor (up to 16kW)
- Range of different grill options
- Deluxe controller option
- Smart WiFi & Voice Control compatible

Considerations

- Requires access space either in the ceiling or under the house
- Single set temperature for all rooms

Zone Control

Manage up to 8 Zones with an Advanced Zone Control System

Advantages

- Individual comfort
- Airflow volume control
- Damper Position Control
- Weekly timer
- Target temperature control
- Track energy consumption
- On/Off nanoe™X
- Intuitive Control with Comfort Cloud App

Considerations

- Automation temperature control is limited to sensing Zone (easily switchable to 4 independent sensors or unit return), note sensors are additional cost.

Multi System

Advantages

- Multiple indoor types
- Up to 5 rooms off one outdoor (up to 10kW)
- Individual control of each indoor unit
- Adjustable room temperatures
- Can be installed in most ceilings
- Smaller pipes so less space required in ceiling or underfloor cavity for installation
- Smart WiFi & Voice Control compatible

Considerations

- Deluxe controller not available
- Choose between:
 - Aero – includes built in WiFi and nanoe™X or
 - Developer – standard unit

Mini VRF System

Advantages

- Multiple indoor types
- Up to 13 rooms off one outdoor (up to 28kW)
- Entire house off one outdoor
- Individual control of each indoor unit
- Long pipe lengths
- Adjustable room temperatures
- Suitable for larger homes
- Deluxe controller option
- Smaller pipes so less space required in ceiling or underfloor cavity for installation
- Smart WiFi & Voice Control compatible

Considerations

- Higher cost
- Expert design required
- Larger units require 3 phase power

All side discharge R32 outdoor units

Panasonic's new range of outdoor units feature intuitive technology and thoughtful engineering. The two innovative ranges of R32 units, both Deluxe and Compact, feature energy and space saving technologies, permitting installation in even the tightest and most demanding conditions.

More Efficient, Less Space

Whilst maintaining its strong power, new R32 outdoor units get smaller. This enables them to fit into tighter spaces. Thus you can install these units in a vast variety of areas.

All side discharge from 6.0kw to 22.4kW

R32 Deluxe

Industry-leading Small Body with All 1-fan Models

R32 Compact

** 3 phase

Precise Temperature Control

Constant Comfort Air Conditioning

R32 Deluxe

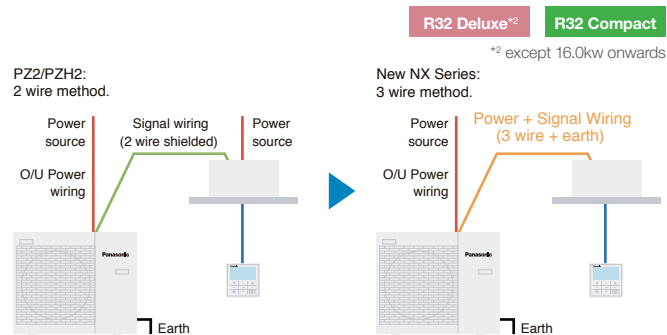

Another advantage of Panasonic Premium Inverter technology includes its ability to ensure precise temperature control and offer a wider power output range to perform in even the most extreme conditions in Australia, ensuring constant comfort.

Graph shows each models' 10.0 kW Inverter High Static Pressure Ducted systems performance range during cooling.

NX Series - Refurbishing Made Easy

The new NX series has been developed to use 3-wired communication, making it simple to replace the three wire systems often used in older installations.

R22 Renewal. Fast, easy to install and cost-effective

Panasonic refrigerant oil is engineered to avoid the damage to units that can happen when oil types commonly found in air-conditioning systems react with each other. As well as preventing damage, this makes replacing R22 systems with the latest R32 model as simple as reusing the existing piping and replacing the indoor and outdoor unit. Switching to the latest R32 system also improves energy efficiency by approximately 30% compared to the R22 system.

Note: Only use existing piping after checking "IN CASE OF REUSING EXISTING REFRIGERANT PIPING" in the installation manual.

Indoor Unit High Static Pressure Ducted

High static and large airflow ducted for exceptional installation flexibility.

- 
Automatic
Restart
Function
- 
DC Motor*¹
*1 only for 6.0-12.5kw

Technical focus

- Design flexibility thanks to high static pressure and large air volume
- Accurate temperature control to reduce cold drafts during operation
- Configurable air temperature control

Compact Body Size

Hidden in the ceiling, ideal when interior decor is an important consideration such as in residences with many rooms and light commercial buildings.

System Example

An inspection port (450 mm x 450 mm or more) is required at the control-box side of the indoor unit body.

HSP Ducted

Product movie

Clean air. Ducts that deliver

Testing has verified that even with three bends and a total length of up to 10m, the effectiveness of nanoe™ X is maintained right through the duct to deliver clean, fresh air where it's needed.

As the experiments demonstrate; even with a total ductwork length of up to 10m, effectiveness of nanoe™ X is maintained.

Note: PF3 and PE3 (16.0kW and below) ranges only.

Cold Drafts Reduced During Heating Operation

- Accurate temperature measurement by E1/E2 sensor to reduce cold drafts during heating operation.

Notes:

- In the case of nanoe X OFF
- In case it is necessary to indicate the air flow volume in (l/s), the value in (m³/min.) shall be multiplied by 16.7 and rounded down the decimal point.
- AEER and ACOP classification is at 230V(400V) only in accordance with GEMS2019.
- TCSPF, HSPF and Total Energy consumption indicate the value of average temperature zone.
- Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions.
- ¹ Outdoor power supply.
- ² Not adjustable, refer to "Indoor Fan Performance" section of technical data.
- ³ For piping connection for 6.0kW unit, connect the gas socket tube (Ø12.7-Ø15.88) to the gas tubing side indoor unit and connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.
- ⁴ For piping connection for 7.1kW unit, connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.

Indoor Unit

High Static Pressure

Adaptive Ducted

Control all aspects of your environment with exceptional performance and quiet operation. Vertical installation flexibility offers the perfect solution when ceiling heights are restricted.

Technical focus

- Space saving 250mm height
- Accurate temperature control to reduce cold drafts during operation
- DC fan motor for variable external static pressure control
- Configurable air temperature control
- Easy to install and maintain

Variable external static pressure control

Optimal airflow set-up is possible for different ducting design and conditions.

Note: Please refer to technical documents for detail.

Powerful 150Pa external static pressure in an industry-leading vertical installation design

Delivering static pressure up to 150Pa external static pressure, the industry-leading horizontal/vertical design offers the power you need in a compact form factor.

Selectable air inlet position

A removable panel allows air inlet position to be adjusted to enable rear or bottom entry, depending on ductwork installation.

Built-in Drain pump (DC motor pump)

External electrical equipment box makes maintenance easy

Space saving height of 250mm for all models

250mm standardised height provides easy and uniform installation for models with different capacities, especially when ceiling heights are restricted.

Top-class noise level performance

A proprietary improved casing design realises an even smoother airflow and low noise (22dB - 29dB) operation while effortlessly maintaining enough pressure*2 to deliver quiet comfort ideal for hotel and guest rooms.

*2 Operating at 50Pa static pressure in Low fan mode.

Note: Silent operation in full rated capacity.

Superior air quality

The new ducted models are equipped with nanoe™ X as standard, a unique air quality improvement technology producing twice the amount of hydroxyl radicals compared to previous generations. Combined with the strong static pressure this ensures pristine nanoe™ X air travels unaffected even through multiple duct shapes at lengths of 10m, as well as making them ideal for use in larger spaces.

Note: PF3 and PE3 (16.0kW and below) ranges only.

Bend once Bend twice Bend three times

Based on in-house test result, even with a total ductwork length up to 10m, effectiveness of nanoe™ X is maintained.

Indoor Unit: High Static Pressure Adaptive Ducted

Notes:

- In the case of standard installation (Horizontal installation in the ceiling, rear side air intake)
- In the case of nanoe X OFF
- In case it is necessary to indicate the air flow volume in (l/s), the value in (m³/min.) shall be multiplied by 16.7 and rounded down the decimal point.
- AEER and ACOP classification is at 230V(400V) only in accordance with GEMS2019.
- TCSPF, HSPF and Total Energy consumption indicate the value of average temperature zone.
- Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions
- H : High at setting 5 stage (Level 5), M : Middle at setting 5 stage (Level 3), L : Low at setting 5 stage (Level 1) Noise of L is indicated by the values at FAN mode.

*1 For piping connection for 6.0kW unit, connect the gas socket tube (Ø12.7-Ø15.88) to the gas tubing side indoor unit and connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.

*2 For piping connection for 7.1kW unit, connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.

Multi-Split Air Conditioning System

Panasonic's multi-split conditioning systems are designed to provide more space saving installation for outdoor units. A neater alternative to preserve the exterior appearance of buildings such as condominiums, single and multi-storey residences.

Compact and lightweight design to fit every building type

- The multi-split system offers greater installation versatility and space-saving choices for condominium with limited free space.

Capacity	2.5kW	3.5kW	5.0kW**	6.0kW**

Advantages Of Multi-Split Air Conditioning System

Space Saving

Multi Split

Space-saving installation with less outdoor units required

- As 1 outdoor unit is able to connect up to 5 indoor units, this provide flexible customization according to the layout of your house.

Independent Operation Control

Outdoor unit connects to each indoor unit independently

- Able to adjust the operation settings for each indoor unit separately. If one indoor unit is malfunctions, other indoor units can continue to operate by provide cooling comfort to the rooms.

Flexible Installation

1
Maximum height up to 15 meters for indoor and outdoor unit.

2
Piping can be extended up to 80 meters.*

The multi-split system accommodates long pipelines up to 80 meters

- Flexible arrangement and installation of indoor and outdoor units based on the room condition, location and installation convenience of the site.

* Applicable to CU-5Z100VBR

Outside air temperature	35°C DB	7°C DB / 6°C WB

2-PIPE Mini-VRF LZ Series

High External Static Pressure
35Pa

High external static pressure 35Pa

When unit is installed on a narrow balcony and exposed to the sun, the fence at the front side would restrict hot air from being discharged. Heat accumulated in an enclosure can cause over-heating. This could potentially result in damage or shorten the product's life span. A high external static pressure sends the air further away from the outdoor unit and through the fence. This provides better air circulation and distribution.

LZ series - High pressure

But with a high pressure of 35Pa, hot air is sent further away preventing overheating inside the outdoor unit enclosure.

LZ series fan

The new LE Series fan has ribs extending near the blade tips, in a structure that resists deformation. During high electrostatic pressure, this blade shape suppresses disruptions in the airflow, and a high air pressure of 35 Pa discharges the hot air a sufficient distance.

Compact design

Also, since Mini VRF LZ Series is a single unit, it is possible to install the unit in more various places compared to the Single Split system.

Single Split

Mini-FSV

In addition to raising efficiency, we have made the outdoor unit more compact. It can now be installed in places that were previously too small.

Long piping design length for greater design flexibility

LZ2

*1: 40m if the outdoor unit is below the indoor unit.

Blue fin condenser

The anti-corrosion Blue Fin treatment of the heat exchanger provides greater resistance against corrosion. All models are equipped with Blue Fin condenser.

Heat exchanger (blue fin condenser)

[Rear view]

Energy savings design

- 1 Panasonic Inverter Compressor** A large-capacity inverter compressor has been adopted. The inverter compressor is superior in performance with improved partial-load capacity.
- 2 Printed Circuit Board** The number of PCB is 2 pieces for making maintenance easier.
- 3 Accumulator** A large accumulator has been adopted to maintain compressor reliability because of the increased refrigerant quantity, which allows an extended max piping length.
- 4 DC Fan Motor** Checking load and outside temperature, the DC motor is controlled for optimum air volume.
- 5 Newly Designed Fan** The newly designed fan blades have been developed to inhibit air turbulence and to increase efficiency. As fan diameter has been increased its size, the air volume has been increased whilst maintaining a same sound level.
- 6 Heat Exchanger & Copper Tubes** The heat exchanger size and the copper tube sizes in the heat exchanger have been redesigned to increase efficiency.
- 7 Oil Separator** A centrifugal separator has been adopted to improve oil separation efficiency and reduce refrigerant pressure loss.

Wide operating range

- Cooling operation is possible even when outdoor temperature is as low as -10°C DB.
- Cooling operation is possible even when outdoor temperature is as high as 52°C DB. (LZ2 series)
- Heating operation is possible even when outdoor temperature is as low as -20°C WB.

LZ Cooling: -10°C DB ~ 52°C DB
LZ Heating: -20°C WB ~ 18°C WB

* For further information please refer to the capacity tables in the Technical Data Book.

The remote controller temperature can be set from 18°C up to 30°C (Cooling), 16°C up to 30°C (Heating)*1.

*1 Depending on the type of remote controller.

Quiet operation mode

- Quiet operation mode reduces outdoor unit operating sound down to 7dB than rating.
- 3-step set point is available.
- External input signal is also available.

* Timer setting of quiet operation mode is available in High-spec Remote Controller (CZ-RTC5B/CZ-RTC6 series).

Wide range of connectable indoor units

An expansion from Panasonic VRF line up, the Mini-VRF is compatible with the same indoor units and controls as the rest of the VRF range.

Dimensions

U-8LZ2E8 / U-10LZ2E8

- ① Mounting hole (4-R6.5), anchor bolt : M10
- ② Refrigerant tubing (liquid tube), flared connection (ø9.52)
- ③ Refrigerant tubing (gas tube), flared connection (ø19.05)
- ④ Refrigerant tubing port
- ⑤ Electrical wiring port (ø13)
- ⑥ Electrical wiring port (ø22)
- ⑦ Electrical wiring port (ø27)
- ⑧ Electrical wiring port (ø35)

For U-10LZ2E8
The tubing of the gas main has a diameter of ø22.22, but the connection to the service valve of the outdoor unit has a diameter of ø19.05, so a flare has to be used. Consequently, be sure to use the enclosed joint tube B and joint tube A in making connections (brazing).
