Note :

1. The value of power consumption, air volume and noise are specified at static pressure of 0 Pa
2. The value of air volume is the mean value measured by our company.
3. The value of noise level is the average of three values measured at 1m apart from left, right and front of product.
4. The value of noise level is A weight average sound pressure level measured by our company.

WINDOW MOUNT TYPE VENTILATING FAN

FEATURES OF

ELECTRIC SHUTTER SERIES

Rain proof and wind resistible

Hood structure for prevention of rain water ingress

High static pressure blade can prevent ingress of rain and wind during operation

Newly designed shutter can keep out the entry of rain water effectively

Bent End Structure of the shutter can block the backflow of outside wind

Easy installation

Mounting Bracket
Unique design of mounting bracket can fix the fan on glass plate with simple process

Packing
No Gasket / No Silicon Seal

Attached packing is tightly close to the glass plate that gets rid of water leakage to indoor

Pervious Setting Method

Both gasket & silicon seal are not required for FV-15WH3T/FV-20WH3T

e.g. FV-15WH3T
Orifice is not necessary to detach for installation. Simply fix the fan on glass plate by screws at front.

High adaptability

New mounting design allows the fan to be fixed on glass plate of thickness from 3mm up to 25mm with ease

Applicable Glass Thickness
3mm-25mm

Double glass

Often called insulated glass that consists of two panes of glass set apart to allow airspace in. This airspace acts as a buffer which obstructs the transfer of heat from one side of the glass to the other.

ELECTRIC SHUTTER SERIES

FV-15WH3T / FV-20WH3T

- Electrically Operated Shutter
- Advanced design hood structure to prevent from rain and wind
- Suitable for window glass with thickness of 3mm to 25mm
- Simple and Easy installation, no need of any silicon seal or gasket

Auto Shutter

The backdraft shutters will be opened by air pressure during operation and closed automatically for air-tightness when the fan is switched off.

Advanced Blade Design

New

Leading Edge forms no obstacle to airflow that streamlines airflow from every direction

Air Foil Chip is to reduce turbulence at rear edge, and the curvature of front edge is improved for smooth airflow that minimizes fan noise as well.

Higher Static Pressure

Newly designed blade can sustain higher static pressure that can withstand more pressure from outside wind.

Easy Maintenance

The blade can be detached by simply loosening the spinner, that facilitates the periodical maintenance.

FV-15WA1 / FV-20WA1 / FV-15WAT2 / FV-20WAT2

- Automatic shutter
- High Performance Condenser motor with thermo cut-off
- Well lubricated bearing for long life operation
- Propeller fan incorporated with advanced blade design
- Removable blade for easy maintenance

High performance condenser motor with long life bearing

- Low power consumption (50% down VS previous model)
- Low noise level (6% down VS previous model)
- Long life up to 40,000 hours (1.5 time VS previous model)
- Comply with IPX4 (outside)

Advanced Blade Design

New

Leading Edge forms no obstacle to airflow that streamlines airflow from every direction

Air Foil Chip is to reduce turbulence at rear edge, and the curvature of front edge is improved for smooth airflow that minimizes fan noise as well.

Strengthened Shutter Structure

- Durable
- Resistant to strong wind

Easy Maintenance

The blade can be detached by simply loosening the spinner, that facilitates the periodical maintenance.
