SNEAK PEEK AT OUR HISTORY

Panasonic was founded in 1918 by Konosuke Matsushita. He took to his heart, people's desire to live life more comfortably, and worked tirelessly to develop a wide variety of innovative new products. That year, Panasonic introduced an improved attachment plug, which allowed people to power an electrical appliance from a light socket. Next was a double cluster socket that made it possible to power lights and appliances from a single source. The ideas were small, but the quality and value of the products were excellent. By offering better products at reasonable prices, the company started contributing largely to the society. Since then, the world has greatly changed, but Panasonic's principles remain unchanged. Today, we express those principles with the words, "Live Your Best."

Konosuke Matsushita
Founder of Panasonic

70+ YEARS LEGACY OF FRESHNESS & HEALTH

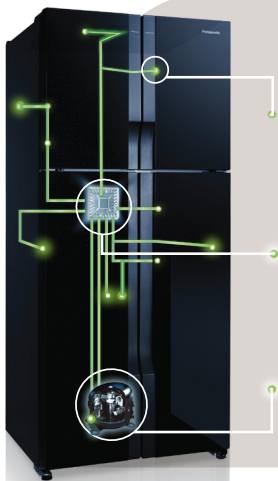

At Panasonic, we have always worked towards enhancing our technology and offering the best-quality products to our customers. We have spent over 70 years in perfecting our research and technology, by virtue of which we have been able to offer an excellent product portfolio across the globe.

CHOOSE A SMARTER TECHNOLOGY

ECONAVI

Here is a refrigerator range that smartly adapts to your lifestyle pattern. It is equipped with ECONAVI sensors that detect conditions of use, and a microprocessor that analyzes them. Using the results of this analysis, the INVERTER compressor adjusts the rotation frequency of the motor to optimize cooling performance

ECONAVI SENSORS

DETECT OPERATING CONDITIONS

ECONAVI MICROPROCESSOR

ANALYZES AND MEMORIZES

INVERTER COMPRESSOR

CONTROLS PRECISELY

ECONAVI MONITORS LIFESTYLE TO MAXIMIZE SAVINGS

ECONAVI technology eliminates power wastage by sensing the times when energy can be saved and automatically switches on power savings.

UP TO
10% LESS
ELECTRICITY USAGE**

ECONAVI OPERATIONS OVER 24 HOURS

6 AM Thorough cooling right up until meal time

7 AM Energy savings operation when nobody is at home

5 PM Energy savings operation when nobody is at home

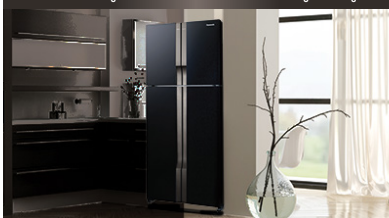

8 PM Increased power when door is often opened / closed

10 PM Energy savings ECONAVI operation when lights are switched off

INTELLIGENT SENSORS ANALYZE AMBIENT CONDITIONS TO DELIVER OPTIMAL COOLING

When surroundings are dark

When surroundings are bright

ECONAVI detects when and how often the refrigerator door is opened and judges the time and frequency of the usage, to adjust the power usage and reduce the cooling wastage.

**ECONAVI 10% savings: a. Based on Panasonic in-house data test conditions; Ambient temperature 32°C – when the temperature setting of the refrigerator is MED. b. Door opening/closing frequency: Refrigerator compartment 35 times and Freezer compartment 7 times. c. ECONAVI functions may not operate ideally in case of power outage. Individual test may vary.

MORE INTELLIGENT. MORE ENERGY EFFICIENT

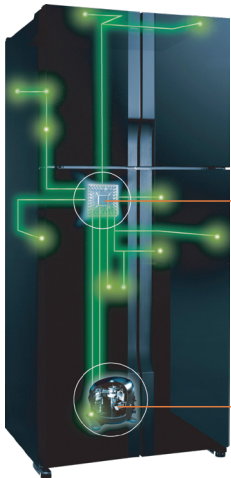

UP TO **6^{***} STAGE INVERTER**

Intelligent inverter varies power consumption to suit the situation; more power in the day when it's opened often and less at night during less usage. This results in exceptional energy efficiency that translates to higher savings due to lesser energy consumption.

UP TO
49%* LESS
ELECTRICITY USAGE

EXPERIENCE DUAL POWER OF INVERTER & ECONAVI SENSORS

INTELLIGENT SENSING

AI Microprocessor analyzes sensor data & sends commands to the compressor

INTELLIGENT ADJUSTMENT

Inverter Compressor adjusts the rotation frequency of the motor to deliver optimum cooling

INTELLIGENT ECO SENSORS
ECONAVI

Monitors ambient conditions to deliver optimum cooling

+

INVERTER

Adjusts the compressor speed for maximum power savings

Inverter

***Flexible 6-Level Power Adjustment for Optimal Cooling and Efficiency

Low Power Cooling

When the refrigerator isn't being used much, it uses less power to save energy.

Full Power Cooling

You need powerful cooling when preparing meals, so the unit runs at full power.

Non-Inverter

Fixed Power - All the Time

3,000 rpm

Full Power Cooling

Cooling power is the same during the day and night so electricity is wasted at night when the refrigerator is hardly used.

*Inverter 49% savings: Based on internal test report tested on model no. NR-BX418. Percentage rates may vary depending on models. All results are based on specific testing conditions and individual test may vary.
ECONAVI 10% savings: a. Based on Panasonic in-house data test conditions; Ambient temperature 32°C - when the temperature setting of the refrigerator is MED. b. Door opening/closing frequency: Refrigerator compartment 35 times and Freezer compartment 7 times. c. ECONAVI functions may not operate ideally in case of power outage. Individual test may vary. *Inverter speeds may vary depending on models.
#Depends on models.#50% Faster Freezing: When compared to non-inverter models.

CHOOSE HEALTH

AG Clean
deactivates bacteria and mold up to 99.9%*

DEACTIVATES
99.9%[^]
BACTERIA

Panasonic refrigerators are thoughtfully crafted keeping the health of your family in mind. We bring you the innovative AG Clean technology that ensures your food retains its freshness and nutrients always

SUPERIOR ANTI-BACTERIAL ACTION

The AG Clean silver air filters clean the circulating air and suppress 99.9%* of mold and bacteria inside the refrigerator

[^]Ag Clean: 99.9% is calculated in-house based on bacteria numbers on standard cloth after 18 hours of inoculation of test bacteria. All results are based on specific testing conditions & may differ under actual usage conditions.

TWIN DE-ODORIZER

Eliminates bad odor. An active enzyme effectively resolves unpleasant and vegetable odors.

ABOUT 80% ELIMINATION

The odor emitted by meat and fish that includes nitrogen components.

NEARLY 100% ELIMINATION

The odor emitted by vegetables and fruits that includes sulphur components.

CHOOSE THE POWER OF BLUE AG+

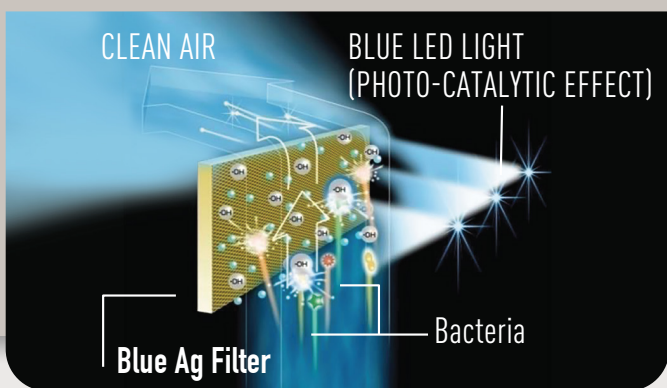

BLUE AG
FILTER

BLUE LED
LIGHTS

The combination of the blue LED lights, antibacterial Blue Ag filter, and -3°C airflow eliminate 99.99%[^] of bacteria for fresher, cleaner storage.

BLUE LED LIGHTS BOOST THE EFFECTIVENESS OF THE BLUE AG FILTER

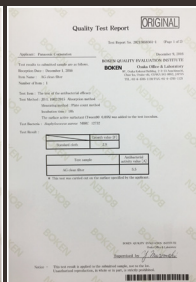

MECHANISM

The blue LED light generates Hydroxyl (OH) radicals that activate the silver in the filter (photo-catalytic effect). This achieves a 99.99%[^] elimination rate in Prime Fresh case.

CERTIFIED BY WORLD'S LEADING QUALITY EVALUATION INSTITUTE

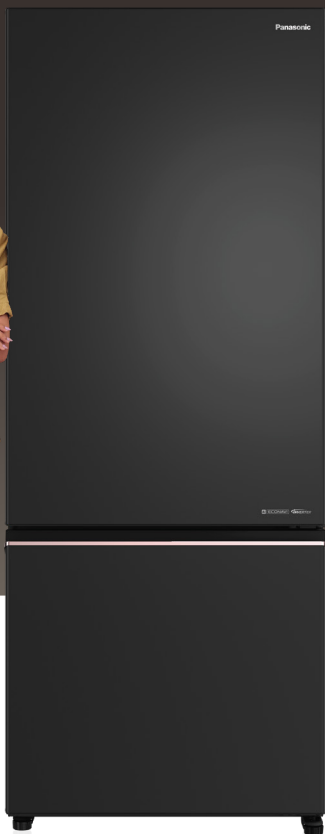

CERTIFIED BY:
BOKEN QUALITY EVALUATION INSTITUTE

[^]Ag Clean: Certified by BOKEN QUALITY EVALUATION INSTITUTE, JAPAN. Test report number 20215058561-1. | 99.9% is calculated in-house based on bacteria numbers on standard cloth after 18 hours of inoculation of test bacteria. All results are based on specific testing conditions & may differ under actual usage conditions.

— INTRODUCING —
**PRIME CONVERTIBLE
BOTTOM MOUNTED REFRIGERATOR**

**IT IS DESIGNED KEEPING
YOU AND YOUR TIME IN MIND**

Unlike conventional refrigerators, the Prime Convertible with its 4 advanced time-saving modes, makes cooking faster, which in turn lets you spend lesser time in the kitchen and more with your family.

❄️ PRIME FRESH

MAKE YOUR COOKING FASTER, EASIER AND MORE DELICIOUS

The Prime Convertible Refrigerator comes equipped with the unique Prime Fresh Technology which is blessed with 4 advanced time-saving modes for various delicacies. Added with an expandable storage for more convenience.

INSTA COOK

Now, you can save the wait and cook without defrosting the frozen food, thus reducing the preparation time. This mode also keeps food fresh and preserves taste for up to 7 days*.

TIFFIN FRESH

When stored normally in the fridge compartment, the taste and freshness of food is lost quickly in most cases but not with the Panasonic Tiffin Fresh Mode. Now, pre-cook meals and store them completely fresh for up to 6 days* with this mode.

PRO-MARINATE

Shorten the marination time with Pro-Marinate mode. Your favorite food gets marinated quicker with better flavor absorption, making it juicier and tastier.

PRO-CHILL

With Pro-Chill, slushes and smoothies are not frozen completely, so you can enjoy the rich texture in which they are to be consumed—ultra chilled and ultra quick.

PRO MARINATE MODE

FLEXI-MULTI- MODES OPERATION

Discover the advantage of the dedicated prime fresh zone and the freezer both of which can be converted into different time-saving modes simultaneously.

NO MORE BENDING FOR EVERY DAY USAGE

Our unique bottom mount freezer with refrigerator section on top, lets you access your daily dose of vegetables and essentials without having to bend. Making it easier for you to find and grab your items with a world of ease.

FLEXI-EXPANDABLE STORAGE

All thanks to the convertible mode of the freezer and the prime fresh zone, you'll never fall short of the desired space to store vegetables, fruits and a lot more.

*Results based on internal lab tests done on selected modes under standard test conditions and may vary depending on testing conditions.

CHOOSE FRESHNESS

FRESH SAFE

MOISTURE-RETAINING FRESH SAFE VEGETABLE CASE

The vegetable case stores vegetables and fruits in optimum conditions with high humidity and a constant temperature to keep everything fresh and juicy for long.

HUMIDITY CARE CONTROLLER

Adjusts humidity levels to ensure lasting freshness of fruits and vegetables.

SURROUND AIR FLOW COOLING

The multiple air ducts, placed uniformly inside, ensure that the food is cooled evenly. This prevents drying of food, keeping it fresher for longer.

THOROUGH, EVEN COOLING

Without surround airflow

Cold air directs unevenly

With surround airflow

Cold air wraps item evenly

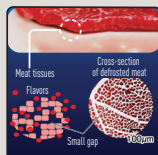

SURROUND AIR FLOW COOLING

QUICK FREEZING

RAPID FREEZING RETAINS FRESHNESS AND FLAVOR

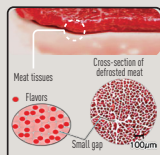

Prevents the loss of freshness by rapidly freezing food so that it passes as quickly as possible through the -1°C to -5°C temperature zone until it's completely frozen, thus keeping the size of ice crystals formed inside the food small.

REGULAR FREEZING

JUICE DRIPS OUT OF THE MEAT

QUICK FREEZING

ALMOST NO DRIPPING

Quick freezing reduces loss of flavor in juice from defrosted meat.

👎 FLAVORS WILL BE LOST FROM MEAT

👍 FLAVORS STAY IN THE MEAT
