Panasonic

R32 RESIDENTIAL & LIGHT COMMERCIAL AIR CONDITIONING 2021 / 2022

Panasonic®

Building Passion, Building Solutions.
Panasonic Air Conditioning Systems

We face a time in which "quality air" differentiates business. It's a time for Panasonic to fully display its strengths. Our ability to assemble and build superior systems isn't just due to the rich resources we have as a comprehensive electronics manufacturer, but also to Panasonic's 100 years of tradition, where each person thinks and acts on their own initiative while working in a team to reach further heights. We do not compromise. Each of our independent selves is a one stop solution. We face our customers' challenges together with our customers and do all that we can to build effective systems. As a true partner for our customers, we strive to always be at the forefront of business.

- Please read the Installation Instructions carefully before installing the unit, and the Operating Instructions before using it.
- Specifications are subject to change without prior notice.
- The contents of this catalogue are accurate as of March 2021.
- Due to printing considerations, actual colours may vary slightly from those shown.
- All graphics are provided solely for the purpose of illustrating a point.

⚠ Do not add or replace refrigerant other than the specified type. Manufacturer is not responsible for damage or deterioration in safety due to usage of other refrigerant.

nanoeX R32 REFRIGERANT

A Better Life, A Better World

QUALITY AIR FOR LIFE

The new Panasonic NX series
The next generation is now

The new CONEX remote controller (CZ-RTC6BLW/CZ-RTC6Z) multiplies the benefits of a standard nanoe™ X installation, letting you create clean, healthy air in your living spaces 24 hours a day, anytime, anywhere. Choose your quality of air - a new era in air conditioning solutions is here.

CONTENTS

nanoe™ X

24-hour[*1]
nanoe™ X Air purification

24-hour nanoe™ X Air purification

Unlike the general filters found in an air purifier, nanoe™ X achieves a powerful inhibiting effect on not only airborne, but also adhered bacteria and viruses.

Make comfort more accessible with CONEX

CONEX goes beyond simple remote control to combine sophistication with simplicity, offering IoT integration that connects directly to a variety of apps for next-generation solutions.

Maximum versatility adaptive ducted unit

Designed to deliver flexibility, performance, and comfort, Panasonic introduces an industry-leading horizontal/vertical design featuring powerful 150Pa static pressure in a compact unit.

*1 The nanoe™ X mode can be run independently from cooling or heating mode, and needs to be on for the 24 hour air purification to function.

Note: PF3 range only.

24-hour nanoe™ X Air purification*1

While the general filters in air purifiers are effective against airborne bacteria and viruses, nanoe™ X also works to inhibit longer-living, adhered bacteria and viruses. As well as this, the CONEX remote control (CZ-RTC6BLW/CZ-RTC6Z) gives you access to your air conditioner anywhere, anytime, so you can turn nanoe™ X on even while you're out and enjoy 24-hour quality air in your home.

Fabrics
Virus lifespan up to 2 days*2

Airborne Viruses
Last up to 3 hours*2

Glass surface
Virus lifespan up to 4 days*2

*1 The nanoe™ X mode can be run independently from cooling or heating mode, and needs to be on for the 24 hour air purification to function.
*2 https://www.businessinsider.com/coronavirus-lifespan-on-surfaces-graphic-2020-3

How does nanoe™ X technology work against viruses?

❶ Huge Quantity
9.6 trillion hydroxyl radicals are generated per second, inhibiting bacteria and adhered viruses. (nanoe X Generator Mark 1 generates 4.8 trillion hydroxyl radicals/ sec)

❷ Longer lifespan
Hydroxyl radicals in nature / Hydroxyl radicals contained in water
By creating hydroxyl radicals contained in water, nanoe™ X technology, increasing hydroxyl radicals lifetime so that nanoe™ X can spread over long distances.
https://www.panasonic.com/global/consumer/clean/hydroxyl/technology.html

❸ Actively fill the room
Going beyond standard filter technology, hydroxyl radicals circulate throughout rooms inhibiting both airborne and adhered bacteria and viruses.

Effective on Adhered Pollutants

nanoe™ X penetrates deep into fabrics and deodorises, inhibits bacteria, viruses, mould, allergens, pollen and hazardous substances.
nanoe™ X extensively spread out through the room to inhibit adhered pollutants adhering to surfaces, while air filters only collect airborne dust but adhered substances.

Curtain | Carpet | Sofa | Clothes surface

nanoe™ X works even in larger space*3

nanoe™ X technology is used in a wide range of product lines, with proven effects*4 in both large and small spaces.

*3 Depends upon the actual system installed and varies depending upon room configuration.
*4 Please refer to P.10 for more information

Standard ducted air conditioning system without nanoe™ X
Viruses or bacteria carried by a room's occupants, as well as external pollutants from open windows, may actually be circulated around a home by conventional air conditioning.

Panasonic ducted air conditioning system with nanoe™ X
With a nanoe™ X-equipped ducted unit, it's not only viruses and bacteria that are circulated, the ducted unit itself produces a massive 9.6 trillion hydroxyl radicals per second which are delivered to rooms throughout the house, inhibiting viruses and bacteria.

24hr nanoe™ X comfort, wherever you are, anywhere, anytime

Get 24 hr Quality Air for you and your loved ones by turning nanoe™ X on using Panasonic Comfort Cloud*5 even when you're out, and enjoying clean air when you're at home. nanoe™ X functions in both cooling and heating modes and is maintenance-free, helping you keep your costs down with cleaner air.

Clean air independently when you are away (Fan Mode + nanoe™ X ON)

Comfort and Clean air when you are at home (Cooling or Heating Mode + nanoe™ X ON)

Only at 70W/Hour*6 Low energy consumption with fan mode 70W per hour for a single unit.
Maintenance-Free No maintenance required for nanoe™X generator device.

24-hour nanoeX Air Purification

*5 Wireless LAN Remote Control for Internet Connection required optional network adaptor. Indoor temperature display and some special function are not available through the App for some models.
*6 Energy consumption may vary depending on models and the external static pressure.

Bringing nature's balance indoors

nanoe™ X technology with the benefits of hydroxyl radicals

The well-being benefits of nature are well known - but do you know the power of hydroxyl radicals?

Abundant in nature, hydroxyl radicals (also known as OH radicals) inhibit pollutants, viruses and bacteria to clean and deodorise. nanoe™ X technology can bring these incredible benefits indoors so that hard surfaces, soft furnishings, and the indoor environment can be a clean and pleasant place to be, whether at home, at work, visiting hotels, shops or restaurants.
Hydroxyl radicals
contained in water

A naturally occurring process

Hydroxyl radicals are unstable molecules looking to react with other elements like hydrogen molecules of pollutants. Thanks to this reaction, hydroxyl radicals inhibit the growth of pollutants such as viruses, bacteria, moulds, and odours, breaking them down and neutralising the unpleasant effects. This naturally occurring process has major benefits to improve indoor air quality.
Bringing nature's balance indoors nanoe™ X technology with the benefits of hydroxyl radicals

nanoe™ X technology with the benefits of hydroxyl radicals

Panasonic's nanoe™ X technology takes a step further and brings nature's detergent - hydroxyl radicals - indoors to help create an ideal environment.

By creating hydroxyl radicals contained in water, nanoe™ X technology significantly boosts their effectiveness, increasing hydroxyl radicals lifetime from less than a second in nature, to more than 600 seconds – 10 minutes.

https://www.panasonic.com/global/consumer/clean/hydroxyl/technology.html

< 1"

600"
Hydroxyl radicals in nature   Hydroxyl radicals contained in water
- nanoe™ X

Effectiveness of nanoe™ X

nanoe™ X deodorises, inhibits bacteria & viruses, mould, allergens, pollen and hazardous substances, as well as moisturising the whole room for smoother skin and hair.

Deodorises	Inhibits 5 types of pollutants					Moisturises
Odours	Bacteria & viruses	Mould	Allergens	Pollen	Hazardous substances	Skin & Hair
For further details and validation data, please refer to the following website:
https://aircon.panasonic.com/introducing/whats_nanoe/nanoex.html

Thanks to the nanoe™ X properties, several types of pollutants can be inhibited.
nanoe™ X reliably reaches pollutants.   Hydroxyl radicals transform pollutants' proteins.   Pollutants activity is inhibited.

The evolution of nanoe™ X technology

Through continuous research and development, nanoe™ X is the latest generation of Panasonic nanoe technology.

	nanoe™	nanoe™ X	
Ion particle structure	480 billion hydroxyl radicals/sec*	4,8 trillion hydroxyl radicals/sec*	9,6 trillion hydroxyl radicals/sec*
	Hydroxyl radicals	10x times	20x times
Generator	2003	Mark 1 - 2016	Mark 2 - 2020

* Measured using ESR method
Sensitive Choice (National Asthma Council Australia) Approved

Sensitive Choice is a community service program that aims to educate people on the importance of managing asthma and allergies. Developed by the National Asthma Council Australia in 2006, the program also encourages companies to produce products and services that are more asthma and allergy aware. Panasonic and Sensitive Choice have partnered to introduce nanoe™ X to the Australian market.

Test result: Odour intensity reduced by 0.7 levels in 2 hours (KT-19-015089-1)

The effects of nanoe™ X are recognised by experts in each field

Professor Masafumi Mukamoto

Osaka Prefecture University
Veterinary Infectious
Disease Studies
Various types of moulds enter houses along with people and air. Even if preventive action is taken in our everyday lives, it is often very difficult to inhibit the growth of mould, especially in humid environments. With nanoe™ X, we have experimental results[3][4] that show we can inhibit the growth of the types of mould and bacteria commonly found in various places in the house.

Hope for the creation of more comfortable spaces for those who have problems with asthma or atopic dermatitis

Professor Masahiro Sakaguchi

Azabu University
School of Veterinary Medicine
Laboratory of Veterinary
Microbiology I

We have experimental results that show nanoe™ X is capable of inhibiting allergens, such as pollen and dust mites. It is important to take precautions against the allergens that we inadvertently inhale in our daily lives.
As nanoe™ X is effective in inhibiting invisible allergens, we can expect it will create a cleaner environment. As the safety of nanoe™ X has also been verified, nanoe™ X gives peace of mind to families with small children.

[3] Experimental results show that nanoe™ X is effective in inhibiting the growth of the following types of mould and bacteria commonly found in homes:
Mould: Trichophyton, Cladosporium, Malassezia furfur, Sporothrix schenckii, Exophiala jeanselmei, Absidia corymbifera, Rhodotorula rubra, Neurospora sitophila, Schizophyllum communeBacteria: Methicillin-resistant Staphylococcus aureus (MRSA), Listeria monocytogenes, Bacillus subtilis, Mycobacterium smegmatis, Nocardia asteroids, Neisseria gonorrhoeae, Salmonella enterica subsp. Enterica, Haemophilus influenza, Campylobacter jejuni.
[4] This verification was designed to generate basic research data on the effects of nanoe™ X on the mould and bacteria in laboratory conditions different from those found in living spaces. It was not designed to evaluate product performance.

Smart comfort with CONEX

CONEX goes beyond simple remote control to combine sophistication with simplicity, offering IoT integration that connects directly to a variety of apps for next-generation solutions.

Simple and sophisticated design in-and-out

User friendly interface with stylish design measuring just 86 x 86 mm, CONEX is an extremely compact remote controller which looks great in any room.

CONEX

(CZ-RTC6BL / CZ-RTC6BLW)

Easy control and access for end users, installers, and service partners with just one remote

User-friendly day-to-day operation for end users, simplified set up for installers, and convenient after-sales service access for service partners - all with one remote control.

A next-generation remote control solution optimised for usability, whatever your needs

Comfort Cloud
▸ End user
• High level control and energy monitoring via WLAN and cloud giving access from anywhere anytime.

H&C Control App
▸ End user ▸ Installer
• Easy setting of timers and scheduling as well as monitoring power consumption.
• Fine tune the equipment to the environment.

H&C Diagnosis App
▸ Service Partner
• Provides the service partner with detailed operational data, for in-depth analysis and optimising the system.

(CZ-RTC6BL / CZ-RTC6BLW)

Note: Can be used with new NX series only.

Note: Bluetooth and WLAN can not be used at the same time.

True-comfort for end user– Comfort Cloud App

With Comfort Cloud, even when you are out, at anytime, you can maintain air quality as you please.
For restaurant owners

Remote control makes 24-hr nanoe™ X air purification[*1] in restaurants a reality, even when they're closed.

For shop owners

Air conditioning before opening and give visitors a more comfortable experience.

For boutique hotel owners

Air conditioning before your guests arrive and give them the welcome they deserve.

Wireless LAN Remote control

CZ-RTC6BLW

Comfort Cloud

[*1] The nanoe™ X mode can be run independently from cooling or heating mode, and needs to be on for the 24 hour air purification to function.

True-comfort for end user and installer – H&C Control App

H&C Control App makes complex initial set-up easy and allows you to respond swiftly to clients' requests via Bluetooth using a smartphone or tablet.

Advantages

Comfort day-to day operations

It's now simpler than ever for end users to further customise settings to meet their needs and perform operations including basic settings.

Intuitive operation for easy configuration

Simplified initial controller configuration together with easy access to comprehensive settings including weekly timer and maintenance.

Straightforward suggestions to clients

Share a single screen with your customer and together tailor everything to meet their needs, from basic setup to weekly timers, all in real time.

Quicker configuration for multiple controllers

Save time with templates - Copy weekly timers and settings to multiple controllers.

True-comfort for service partners – H&C Diagnosis App

The H&C Diagnosis app allows users to intuitively browse current stats and information about an air conditioner via Bluetooth® using a smartphone or tablet and without the need to use a PC.
Outdoors   Indoors

Advantages

Acquire diagnostic information from both outside and inside

Outdoor diagnosis is now possible via a new service checker interface*1. With CONEX, operation status can be checked and failure can be diagnosed from indoors too. The information you need is now available via both indoor and outdoor units even when site access may be difficult for either indoor or outdoor unit.

*1 Available as a spare part, compatible with new NX series only.

Acquire the information you need intuitively and quickly

Easy access to real-time service parameters and service checker data allows for more accurate repairs. Actual real-time operation data can be toggled between system and refrigerant circuit views, and previously recorded data can be viewed in the history.
A comprehensive error code table and guide gives details of error codes and how to handle them.

Refrigerant circuit view   Real time data   History data   New service checker interface (Details are written in P.81)

Maximum versatility adaptive ducted unit

Designed to deliver flexibility, performance, and comfort, Panasonic introduces an industry-leading horizontal/vertical design featuring powerful 150Pa static pressure in a compact unit. Leading-class noise level performance and nanoe™ X technology provide comfort that's carried right the way through the ductwork.

Powerful 150Pa ESP in an industry-leading vertical installation

Our groundbreaking drain pan design delivers a ducted unit that can be mounted horizontally or vertically without the need for alterations*[1]. Even when ceiling space for ductwork is limited, the slim design and powerful 150Pa static pressure allow for discrete placement away from rooms for total installation flexibility.

*[1] Please refer to Installation Manual for full details.

Drain pan is shared in both cases horizontal and vertical installation.

Top-class noise level performance

A proprietary improved casing design realises an even smoother airflow and low noise (22dB - 29dB) operation while effortlessly maintaining enough pressure*[2] to deliver quiet comfort ideal for hotel and guest rooms.

*[2] Operating at 50Pa static pressure in Low fan mode.

Conventional fan casing → NEW fan casing

Sound pressure dB(A).

Note: Silent operation in full rated capacity.
Superior Air Quality   nanoe™ X

The new ducted models are equipped with nanoe™ X as standard, an unique air quality improvement technology producing twice the amount of hydroxyl radicals compared to previous generations. Combined with the strong static pressure this ensures pristine nanoe™ X air travels unaffected even through multiple duct shapes at lengths of 10m, as well as making them ideal for use in larger spaces.

Note: PF3 and PE3 (16.0kW and below) ranges only.

10m

Bend once   Bend twice   Bend three times
Based on in-house test result, even with a total ductwork length up to 10m, effectiveness of nanoe™ X is maintained.

Power-packed lower profile body

The indoor units have also been completely renewed, offering a 40mm height reduction to only 250mm*[3] and a weight reduction of up to 10%, all while maintaining the same powerful 150 Pa.

*[3] Compared to previous PF range.

PF1 Series   NEW

−40mm

−3kg

Height 290mm Weight*33kg   Height 250mm Weight*30kg
Note: In the case of 6.0kW and 7.0kW.

Selectable air inlet position

The air inlet position is adjustable via a removable panel to allow both rear or bottom entry, depending on the duct installation.

Rear suction   Bottom suction
Easy to install splittable ducted

Create comfort faster. The newly designed high static pressure ducted model is improved for a more flexible installation. By dividing the unit into 3 components, the burden of installation is reduced.

Note: In the case of the S-180PE3R5B, S-200PE3R5B, and S-224PE3R5B

Even cooling for all rooms

Top Grade of Airflow Volume

Providing powerful air, Panasonic's splittable ducted has increased the rate of airflow by 16%[1], reaching up to 1,400 L/s[2]. Its powerful airflow enables faster room temperature control.

Previous Model — 1,200 L/s

New Model — 1,400 L/s[2]

16%[1] Volume Up

3-step Static Pressure Set Up

You can select between the three Static Pressure modes of 200 Pa / 130 Pa / 75 Pa for extra installation flexibility.

75Pa[2] Factory Setting   130Pa[2]   200Pa[2]

Max.200 Pa Static Pressure Setting

A maximum static pressure setting of a powerful 200Pa enables the use of long ducts for installation in a wide range of spaces. Ideal for large-scale houses, offices and restaurants.

*[1] Comparison between S-224PE3R5B and S-224PE2R5B *[2] In case of S-224PE3R5B

Easy Installation Design

3 Components For Easy In-Ceiling Assembly

The newly designed high static pressure ducted consists of 3 components, the heat exchanger, the fan and the fan casing. For easy installation, the unit has been designed to be lifted into the roof via return air grille, separated, and easily reassembled when in position.

Heat Exchanger
Fan
Fan Casing
New Ducted Model Key Factors

Bell Shaped Keyhole for Weight Support

Part of the keyhole is newly designed with a bell shape to reduce the burden of installation. It also enables temporary attachment.

2 Wire Connectors for Easy Installation

With only 2 wire connectors, installation has become much easier and faster.
12 Bolts & Screws for Easy Assembly

Only 12 screws and bolts need to be attached, allowing for a shorter installation time.

Easy Assembly Steps

Assembly takes three easy steps, even in limited spaces.

1 Install the fan to the heat exchanger and tighten the screws and bolts.

2 Assemble the connectors.

3 Install the chassis and tighten the screws and bolts.

Damper and Damper Motor
(locally supplied)

Only drive open, drive close dampers motor can be connected. (Spring motor damper cannot be used.)
A maximum of 8 can be connected.

Transformer
(locally supplied)

Use models suitable for the damper motors.

Zone System Outline

DUCT WORK DESIGN

Flexible ducted design is possible. Choose between below two duct designs.

Using the Common Zone

Install a common zone that is always open so that the static pressure is within the indoor fan curve (the PQ diagram) range regardless of the open/closed state of the damper.

1st floor — Common zone, Zone no.1, Zone no.2
2nd floor — Zone no.3, Zone no.4
Using the Spill Zone

This is the installation method in which the damper specified by the installer is automatically opened fully according to the load conditions to release the air to avoid excessive static pressure.

1st floor — Zone no.1, Zone no.2
2nd floor — Zone no.3, Zone no.4

All side discharge R32 outdoor units

Panasonic's new range of outdoor units feature intuitive technology and thoughtful engineering. The two innovative ranges of R32 units, both Deluxe and Compact, feature energy and space saving technologies, permitting installation in even the tightest and most demanding conditions.

R32 REFRIGERANT **DRED** ready **INVERTER** **MEPS** COMPLIANT **Blue Fin Condenser**

More Efficient, Less Space

Whilst maintaining its strong power, new R32 outdoor units get smaller. This enables them to fit into tighter spaces. Thus you can install these units in a vast variety of areas.

All side discharge from 6.0kw to 22.4kW

R22 Renewal. Fast, easy to install and cost-effective

Panasonic refrigerant oil is engineered to avoid the damage to units that can happen when oil types commonly found in air-conditioning systems react with each other. As well as preventing damage, this makes replacing R22 systems with the latest R32 model as simple as reusing the existing piping and replacing the indoor and outdoor unit. Switching to the latest R32 system also improves energy efficiency by approximately 30% compared to the R22 system.

R32 Deluxe   R32 Compact

Only need to replace the indoor unit, outdoor unit and some accessories.

Inoor Unit
Outdoor Unit

Note: Only use existing piping after checking "IN CASE OF REUSING EXISTING REFRIGERANT PIPING" in the installation manual.

Outdoor Unit

Next Generation Refrigerant: R32

R32 Deluxe | R32 Compact

R32, an innovative refrigerant in all ways imaginable: it is easy to install, and compared to most other refrigerants it has a much lower environmental impact and saves energy.

- Low Global Warming Potential (GWP): 75% less impact on global warming vs R410A
- Energy Efficient: Higher energy efficiency than R410A
- Easy Installation: This refrigerant is 100% pure which makes it easier to recycle and reuse.

Energy Saving Technology

R32 Deluxe

The use of energy saving design for the structure of fans, fan motors, compressors and heat exchangers results in high TCSPF and HSPF value, which ranks as one of the top in the industry.

Cooling (TCSPF)

7.1 kW	10.0 kW	12.5 kW	14.0 kW
6.83	7.09	6.72	6.43

Heating (HSPF)

7.1 kW	10.0 kW	12.5 kW	14.0 kW
5.30	5.35	5.32	5.25

* The graph shows 4-WAY Cassette R32 Deluxe models values.

*15m if the outdoor unit is below the indoor unit (7.1kW - 14.0kW)
Product Quality and Safety

R32 Compact | R32 Deluxe

All Panasonic air conditioners undergo strict quality and safety tests before sale. This rigorous process includes obtaining all necessary Safety Approvals, to ensure that all air conditioners we sell are not only built to the highest market standards, but are also completely safe.

Quiet Mode

R32 Compact | R32 Deluxe

Quiet mode reduces outdoor operating sound by 2dB. External input signal is also available.

Demand Response Compliant

R32 Compact | R32 Deluxe

Panasonic air conditioners are equipped with a Demand Response Enabling Device (DRED) which complies to both AS 4755 and AS 3823. Panasonic continues to design and develop products that are tailored to local needs and requirements.

The Equipment Energy Efficiency (E3) program has been supporting the development of DRED standards for air-conditioners which should comply with AS 4755. The functionality will be required for all installations in the very near future

Notes:
- In the case of nanoe X OFF
- In case it is necessary to indicate the air flow volume in (l/s), the value in (m³/min.) shall be multiplied by 16.7 and rounded down the decimal point.
- AEER and ACOP classification is at 230V(400V) only in accordance with GEMS2019.
- TCSPF, HSPF and Total Energy consumption indicate the value of average temperature zone.
- Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions.

*1 Outdoor power supply.
*2 Not adjustable, refer to "Indoor Fan Performance" section of technical data.
*3 For piping connection for 6.0kW unit, connect the gas socket tube (Ø12.7-Ø15.88) to the gas tubing side indoor unit and connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.
*4 For piping connection for 7.1kW unit, connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.

Indoor Unit

High Static Pressure

Splittable Ducted

High static and large airflow ducted for
exceptional installation flexibility.

| Self-diagnosing Function | Automatic Fan Operation | Dry mode (DRY) | Automatic Restart Function | DC Motor |

*Zone Controller for residential use
Note: Product image not to scale.

Technical focus

- Easy installation with splittable chassis design
- Max. 200Pa static pressure setting*1
- Design flexibility thanks to high static pressure and large air volume
- DC motor equipped

- Low power input
- Accurate temperature control to reduce cold drafts during operation
- Configurable air temperature control

*1 In case of S-224PE3R5B

Easy Installation with Light Component

Compared to conventional models, the new Panasonic splittable ducted weighs in at approximately 10%*2 lighter. This notion is further emphasised by the unit's ability to split into three components, the heaviest of which totals at 48kg.

Maximum chargeless length			m	30	30	30
Refrigerant at shipping / Additional gas amount			g	R32 3,400 / 45/60*6 (g/m)	R32 5,200 / 80 (g/m)	R32 5,200 / 80 (g/m)
Operation ranges		Cooling : Heating	°C	-15 to 46 : -20 to 24	-15 to 46 : -20 to 24	-15 to 46 : -20 to 24

Notes:
- In the case of nanoe X OFF
- In case it is necessary to indicate the air flow volume in (l/s), the value in (m³/min.) shall be multiplied by 16.7 and rounded down the decimal point.
- AEER and ACOP classification is at 230V(400V) only in accordance with GEMS2019.
- TCSPF, HSPF and Total Energy consumption indicate the value of average temperature zone.
- Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions

*5 Tubing size is Ø25.40 when the piping length is over 50m for U-180PZH2R8 and 30m for U-200PZH2R8 and U-224PZH2R8.
   Also, joint needs to be prepared by the site for U-180PZH2R8 when the piping length is over 50m. Please refer to technical documents for more details.
*6 Additional gas amount is 45g/m when the piping length is under 50m and 60g/m when the piping length is over 50m.

Indoor Unit

High Static Pressure

Adaptive Ducted

Control all aspects of your environment with exceptional performance and quiet operation. Vertical installation flexibility offers the perfect solution when ceiling heights are restricted.

Self-diagnosing Function | **Automatic Fan Operation** | **Dry mode** (DRY) | **Automatic Restart Function** | **Built-in Drain Pump** (D.P.) | **DC Motor**

Note: Product image not to scale.

Technical focus

- Space saving 250mm height
- DC fan motor for variable external static pressure control
- Easy to install and maintain

- Accurate temperature control to reduce cold drafts during operation
- Configurable air temperature control

Variable external static pressure control

Optimal airflow set-up is possible for different ducting design and conditions.

Optimal Control by DC Motor

For short ducting such as hotels — 10Pa ← → 150Pa — For long ducting or for usage with high density filter

Note: Please refer to technical documents for detail.

Powerful 150Pa external static pressure in an industry-leading vertical installation design

Delivering static pressure up to 150Pa external static pressure, the industry-leading horizontal/vertical design offers the power you need in a compact form factor.

250mm
Selectable air inlet position

A removable panel allows air inlet position to be adjusted to enable rear or bottom entry, depending on ductwork installation.
Built-in Drain pump (DC motor pump)

External electrical equipment box makes maintenance easy

Space saving height of 250mm for all models

250mm standardised height provides easy and uniform installation for models with different capacities, especially when ceiling heights are restricted.

Built-in filter
Discharge air temperature control

- Possible to control discharge air temperature for accurate room temperature control.
- Possible to reduce cold drafts during heating operation.

Note: Before spec-in, please consult with an authorised Panasonic dealer.

Air intake sensor
E2 sensor
E1 sensor
System example

An inspection port (450 mm x 450 mm or larger) is required at the lower side of the indoor unit body.

Rectangle duct | Canvas duct
Inspection port (450 x 450 mm or more) | Intake grille
More powerful drain pump

Using a high-lift built-in drain pump, drain piping can be elevated up to 701 mm from the base of the unit.

Up to 300 mm
Up to 500 mm
201 mm
Indoor Unit: **High Static Pressure** Adaptive Ducted

CS-Z50UD3RAW
CS-Z60UD3RAW

Wired remote controller included.

CZ-TACG1*[1]

Note: Product image not to scale.

Technical focus

- Space saving 200mm height
- Rear or Bottom Return Air Options
- Built-in Drain Pump
- DC fan motor greatly reduces power consumption

- Easy maintenance and service by external electrical box
- 40 Pa static pressure enables ductwork to be fitted.

Ultra-slim profile for all models

200mm height for all models allows installation in very narrow ceilings.

200mm

Drain pump with increased power

Using the built-in high-lift drain pump, the drain piping rise height can be increased to 653 mm from the lower surface of the body.

Up to 300 mm
Up to 500 mm
153 mm

Notes:
The Rated Capacity, Power Input and Running Current are measured in accordance with AS/NZS 3823
- Cooling: Indoor temperature: 27°C DB/ 19°C WB, Outdoor temperature: 35°C DB/ 24°C WB
- Heating: Indoor temperature: 20°C DB/ 15°C WB, Outdoor temperature: 7°C DB/ 6°C WB
- Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions
- Sound levels are measured in default status which is rear return air, when changing to bottom return air, sounds levels may be higher.
- Ultra Slim Ducted is not supported by PAC Smart Connectivity+.

*[1] If you connect WLAN adaptor (CZ-TACG1) to an indoor unit other than wall mounted type and operate from the smartphone with Panasonic Comfort Cloud App, airflow direction may not be operated as it is shown on the display.

Indoor Unit
4-WAY Cassette

Featuring uniform cooling, easy installation, and with a sleek exterior, this unit is the perfect match for all commercial applications.

Technical focus

- Compact design
- Low sound levels
- DC fan motor for increased efficiency
- Powerful drain pump gives 850 mm lift
- Lightweight design
- Fresh air knockout
- Branch duct connection
- Optional air-intake plenum CZ-FDU3

360° Wide & Comfortable Airflow

Ample airflow: 600 l/s
Industry's leading in the 140PU class.

Comfort/Quiet

Our design features wide-angle outlets and flaps that were designed through expert mechanics and proto-type tests. Air from the center is sent farther and the air blown out of the larger, side flaps spreads through-out the room. The air comes from all for sides of the unit and expands gently in a circle centered on the indoor unit.

Temperature distribution by thermograph (cooling operation)

Simulation conditions:
P140 4-WAY Ceiling Mounted Cassette type in cooling mode / Floor area of 225 m²/ Ceiling height of 3 m

360° Wide
1m

Wide Flap

Adding a sub flap and widening the main flap have reduced turbulence and increased airflow. Also, setting the jetting port at a wider angle allows the airflow to reach the corners of the room more quickly.

Conventional   **New Model**

Width 48mm   Width 70mm

Previous flap   New flap

Sub Flap

Airflow turbulence is generated   Airflow turbulence is reduced
3D Turbo Fan

Using a twisted 3D blade made the unit slimmer and more compact, while also increasing the airflow. A 5-Speed mode allows the airflow to be adjusted in 5 steps to suit the situation.

Conventional   **New Model**

Notes:
- In the case of nanoe X OFF
- In case it is necessary to indicate the air flow volume in (l/s), the value in (m³/min.) shall be multiplied by 16.7 and rounded down the decimal point.
- AEER and ACOP classification is at 230V(400V) only in accordance with GEMS2019.
- TCSPF, HSPF and Total Energy consumption indicate the value of average temperature zone.
- Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions
- H:High at setting 5 stage (Level 5), M:Middle at setting 5 stage (Level 3), L:Low at setting 5 stage (Level 1)

*1 For piping connection for 6.0kW unit, connect the gas socket tube (Ø12.7-Ø15.88) to the gas tubing side indoor unit and connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.
*2 For piping connection for 7.1kW unit, connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.

Indoor Unit
Low Profile Mini Cassette

NEW

Redesigned for a lower vertical profile, it fits easily into a standard 60 x 60cm ceiling grid without the need to alter bar configuration. This makes the Low Profile Mini Cassette ideal for small commercial and retrofit applications, in particular those with lower ceilings.

Technical focus

- Market-leading Energy Efficiency
- Compact Design (230mm High)
- Easy Installation
- Built-in Drain Pump
- Mini cassette fits into a 60 x 60 cm ceiling grid
- Powerful drain pump gives 850 mm lift
- DC fan motor with variable speed and a new heat exchanger ensures efficient power consumption
- Multi-directional air flow

Compact, stylish design

Thanks to advanced Panasonic design the panel is a compact 625 x 625mm, offering elegant, unobtrusive installation even where space is limited.

625mm
625mm
Lighter and slimmer for easier installation

When only 230mm of indoor body height, it can easily fit in limited spaces and tight spots. (Required 243mm from bottom of panel to top of the unit)
Indoor Unit
243mm
30mm
Individual flap control

Keep everyone comfortable by directing air where it's needed and away from where it isn't with individual flap control.

A drain height of up to 850 mm from the ceiling surface

The internal pump allows the drain pipe to be elevated up to 850mm above the base of the unit.

Indoor Unit
850 mm

Compact Looking, Stylish, One-Motion Design

With its streamlined, one-motion form, the unit looks thin and compact when installed for a neat appearance in any room.
When not operating, the louver closes to provide an elegant look while also keeping the unit clean.

Energy-Saving Technology Delivering Top-Class Efficiency

Top Class Energy Saving

Optimisation of the shape of the casing and fan assures bigger air flow and higher efficiency. Energy-saving performance is top class in the industry.

Notes:
- In the case of nanoe X OFF
- In case it is necessary to indicate the air flow volume in (l/s), the value in (m³/min.) shall be multiplied by 16.7 and rounded down the decimal point.
- AEER and ACOP classification is at 230V(400V) only in accordance with GEMS2019.
- TCSPF, HSPF and Total Energy consumption indicate the value of average temperature zone.

*1 For piping connection for 6.0kW unit, connect the gas socket tube (Ø12.7-Ø15.88) to the gas tubing side indoor unit and connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.

*2 For piping connection for 7.1kW unit, connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.

Wall Mounted

Providing small, lightweight and low noise level design,
it is ideal for small offices and other commercial applications.
It also has a stylish smooth design with a washable front panel.

Technical focus

- Closed discharge port when not in use
- Lighter and smaller units make installation easy
- Quiet operation
- Smooth and durable design
- Piping outlet in six directions
- Washable front panel
- Air distribution is automatically altered depending on the operational mode of the unit

Closed discharge port

When the unit is turned off, the flap closes completely to prevent entry of dust into the unit and to keep the equipment clean.

Quiet operation

Low operating noise level makes these units ideal for hotels and hospital applications.

Piping outlet in six directions

Piping outlet is possible in the six directions of right, right rear, right bottom, left, left rear, left bottom, making installation easier.

Washable front panel

The indoor unit's front panel can be easily cleaned for trouble-free maintenance.

Air distribution is automatically adjusted depending on the operational mode of the unit

Air outlet angle is automatically adjusted for cooling and heating operation.
Heating: F1 to F5
Cooling: F1 to F3

CZ-TACG1*1

Note: Product image not to scale.

Technical focus

- A breakthrough design that integrates perfectly with the most modern environments.
- Compact design fits 50mm wall recess

Upper & Lower Vane Blow

Optimum air flow from the top and bottom of the unit assures that even your feet are kept comfortably warm. (Only during heating)

Cooling   Heating

Upward air flow efficiently cools the entire room.

Upward and downward air flow warms the whole room uniformly.

Compact Design

The design features a flat, elegant front panel that provides a neat appearance and the unit can be recessed into a wall up to 50 mm.

50mm

Super Quiet

The indoor and outdoor units deliver quiet operation and pressing the Quiet mode button lowers operation noise even further to just 19dB for indoor unit with low fan speed.

19dB*1
Indoor
*1 CS-Z25UFRAW & CS-Z35UFRAW: In the Quiet mode during heating operation with low fan speed.

Smart Connectivity and Control Solutions

Panasonic offers a range of smart connectivity and control solutions for residential and commercial applications that allow you to conveniently manage and monitor air conditioning units in single or multiple locations from one mobile device. Add solutions for partners such as contractors and service providers that simplify everything from configuration to repair diagnosis and discover a streamlined, next-generation air conditioning ecosystem.
Wide Range of Smart Control Solutions for All Needs

Whether you're a contractor or service provider looking for solutions to streamline everything from configuration to repair diagnosis, a facility manager overseeing multiple sites or a single office, or you're simply managing a home system, we offer a range of innovative, next-generation smart control solutions to suit your needs.

For end users and facility managersr

Panasonic Comfort Cloud
Intuitive and scalable air conditioning control solution using a personal mobile device.

PAC Smart Connectivity+
Offers efficient energy management with high indoor air quality(IAQ) control.

Panasonic AC Smart Cloud
Monitor and manage energy consumption of multiple location through a cloud computing system.

For contractors/service providers

H&C Diagnosis APP H&C Control APP
Connect to APP via Bluetooth for greatly improved convenience during configuration and repair diagnosis.

For Residential

Panasonic Comfort Cloud

Home Automation Ready

Personal Control Solutions
Panasonic Comfort Cloud

Remotely manage and monitor multiple air conditioning units in your home
Easily control and access all features of the air conditioning units with smart centralised control.

Intuitive voice control
Control air conditioning units by voice command connecting to smart speaker.

works with Hey Google [1]   works with alexa [1]

PLUG & PLAY FOR HOME AUTOMATION
Easily connect with integrated controllers to become part of your automated home network.

Note: For further information, please check CLIPSAL® website.

CLIPSAL by Schneider Electric

For Light Commercial

Panasonic Comfort Cloud

PAC Smart Connectivity+

Cost effective Energy Management Solution

Connectable up to **200 Units** with just 1 device

Multiple location control at your convenience with Comfort Cloud
Gain control of multiple zones and sites intuitively adjusting temperature by areas with differentiated user rights settings.

Indoor Air Quality(IAQ) and efficient energy usage with PAC Smart Connectivity+
- Ultimate cooling comfort with sensing technology and automatic IAQ control.
- Simplified Plug & Play installation with BMS connection for better energy consumption.

For Multiple Building Management

Panasonic AC Smart Cloud

Full Control of All Installations From A Single Internet Connection
Panasonic AC Smart Cloud

Manage and monitor energy consumption patterns
Analyse energy usage, running time and optimise temperatures to reduce energy costs.

Centralised control solution with zero downtime
Receive real-time status updates to prevent breakdowns.

Flexible and scalable solution for expanding businesses and multi sites
Adaptable solutions that can easily be upgraded for new features, meet user demand and better IT management.

Google Home and Alexa are compatible with the air conditioning systems shown on pages 4 and 5. Google and Alexa functionality is only available with complete air conditioning systems (including Panasonic controllers).
Panasonic Comfort Cloud

Control air conditioning units from wherever and whenever with your smartphone, by using Panasonic Comfort Cloud and WLAN smart adaptor.
This scalable solution is ideal for one system, one site or multiple locations. Coupling the adapter with the already feature rich systems, makes it an ideal solution for both residential and commercial applications.
Comfort Cloud

For Residential

Remotely manage and monitor air conditioning units from anywhere anytime.

For Light Commercial

Gain control of multiple zones and sites intuitively up to 200 indoor units.

■ Panasonic Comfort Cloud features

Voice Control

Control air conditioning units by voice command intuitively connecting to smart speaker.*1

works with Hey Google

works with alexa

From 1 to 200 units

User can control up to 200 indoor units. 10 different sites, with up to 20 units / groups per site.

Connectable up to **200 Units** with just 1 device

Easy Scheduling

Complex weekly scheduling made simple. Not only for one units, but across multiple sites and from a smartphone.

| SUN | MON | TUE | WED | THU | FRI | SAT |

Custom timer according to your working day and hour

Multiple User

The Panasonic Comfort Cloud App allows multiuser access control. Restrict user access to specific units.
Energy Monitor

See the estimated power consumption and compare with other periods to see how energy bill can be reduced even more.*2
Error Codes

Error code notification through the App, provides early notification and allows for faster repair.

■ Application Examples

Boutique Hotel

Centralised control from reception.

Karaoke **SPA**
Learning institute **Restaurants**

Multiple location control for small business.

■ System configuration

Network Adaptor

CZ-TACG1   CZ-CAPWFC1

CZ-TACG1: For products for small sized project.
CZ-CAPWFC1: Available for all types of VRF and PAC indoor unit.

Case study

Panasonic VRF system was selected for the smart apartments, Lilydale Grove, which integrates robust automation technology to simplify your life. While other air conditioner brands need a adaptor to connect to HEMS, Panasonic can seamlessly connect with Schneider's Home automation, one of the market leaders in the HEMS industry.

- •Air conditioning system   FSV Heat Recovery (20 systems)
       FSV Heat Pump (4 systems)
- •Cooling Capacity   742kW
- •Indoor units   278 units
- •Control System   SE8000 series 278units

Note: System combination as of July 2020

PAC Smart Connectivity+

Through thorough energy management, Panasonic's PAC Smart Connectivity+[*1] is a completely new, state-of-the-art solution providing energy saving and comfort as well as simple installation, operation and maintenance.

Schneider Electric

PAC Smart Connectivity+

PAC Smart Connectivity+ offers efficient energy management and a new air conditioning control solution with high IAQ (Indoor Air Quality).

| Energy Management System for Rooms | Each room is monitored by high-precision sensors, making it possible to make every room's temperature comfortable without wasting energy. |
| Management System for the Entire Building | A Building Energy Management System (BMS) can also be connected for Plug & Play centralised control of the building's entire energy consumption. |

Advantages

Dramatic Reduction of OpEx with Outstanding IAQ.
· 3 Built-in sensors: Temperature, RH and Occupancy
· ZigBee wireless sensors: CO_2/Temperature/ RH%, window/door, ceiling/wall

User-/Owner-friendly.
· Colour touch screen
· Ease and simply of use
· 22 Languages
· Easy-to-understand error description

Ultimate Customisation.
· Background colour customisable
· Custom display/icons, messages
· Programmable logic (also stand alone)
· Various controls and various external connection devices

Easy Design and Plug and Play to Reduce CapEx.
· Simple Plug & Play connection to Building Energy Management System (BMS)
· Stand alone or BMS connected
· Easy Installation of Zigbee Sensors

PAC Smart Connectivity+ ~New SE8000 series~

1. Quality Air Control

Optimum IAQ is realized using the CO_2 & humidity sensors. The interior remains comfortable, while heating and cooling costs are minimized.
The CO_2 sensor controls ventilation systems which contributes to improving the room's air quality.

2. Room Key Card or Key Cardless Solutions for Hotels

Solutions are provided that meet the needs of various regions and hotel grades.
Whilst the previous model's automatic detection function offered optimal air conditioning with or without a hotel room key card, the latest model enables conventional key cards to control air conditioners and other devices coordinately.The increase in the types of devices that can be connected enables customized control of any hotel room.

3. Other Equipment Control

One room controller manages various devices including lighting and the blinds.
A ventilation system and other external connection devices can be connected by using HRC[*2] or SE8350 so that various control is possible with this controller alone, even without BMS.

Schneider Electric

*1 Not compatible with Ultra Slim Ducted, 4-Way Mini Cassette and Floor Console systems.

*2 Available through a Schneider Electric distribution channel.

Energy Management System for Rooms

By installing a ceiling motion sensor, wall motion temperature sensor, window/door sensor, and CO_2 sensor in the room, ideal, waste-free air conditioning is achieved.

Hotel Room Controller (HRC)*[1]
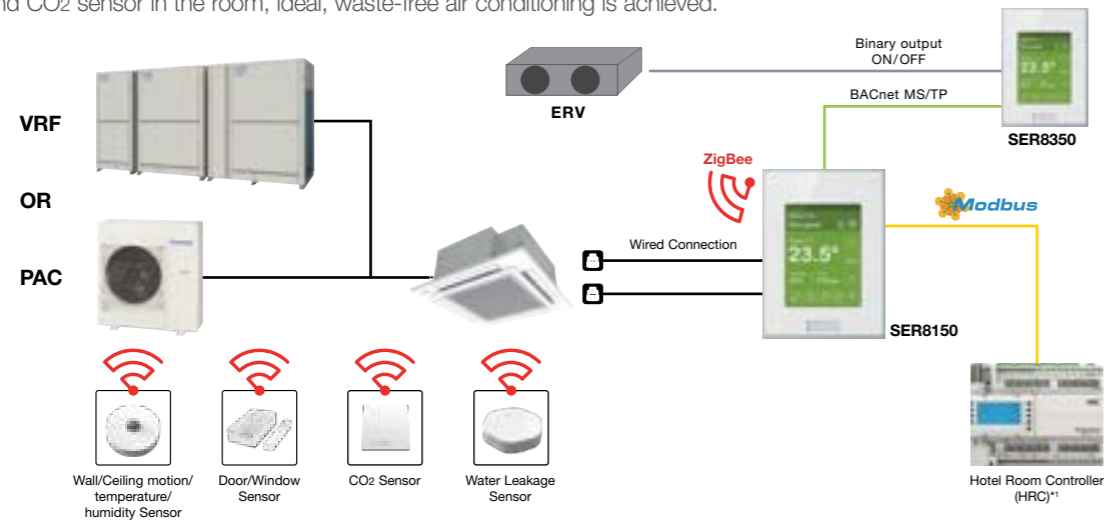

Sensing & Control technology

Using sensors from Schneider Electric, high-quality occupancy control and automatic IAQ control were realised. The sensors detect the presence or absence of occupants, and the opening and closing of doors and windows to achieve the most efficient energy management for exceptional air-conditioned comfort. Flexible installation is possible to match different applications and building features such as walls, ceilings and proximity to doors and windows. No wiring means extra installation versatility.

Connectable to third party ERV

Window sensor (option)

ZigBee

Ceiling motion sensor (option)

Door sensor (Option)

Room controller

Built in PIR, Humidity

CO_2 sensor (option)

Water leakage sensor (Option)
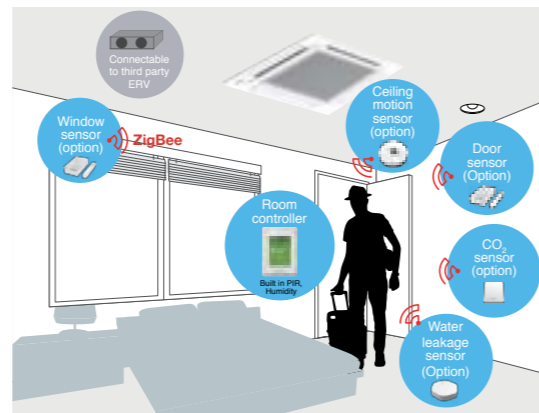

Batteries last for up to five years (10-year battery for CO_2 sensor) and are easy to install and replace.

Door/Window Sensor
Door and window contact detection sensor to monitor opening and closing.

Wall/Ceiling motion/ temperature/humidity Sensor
Wall and ceiling sensor to detect the presence or absence of occupants.

CO_2 Sensor
Monitor indoor air quality, review data on interfacing devices, and control fresh air inside customizable zones.

Water Leakage Sensor
Two sensing pads under the body activate when water is present between the two pads. Detecting the water, the sensor reports the event to the controller.

SER8350
Programmable controller for HVAC equipment. Includes local memory to store control sequence.

Hotel Room Controller (HRC)*[1]
The Hotel Room Controller controls connected guest room devices and aggregates data, making it visible to guest room and property management systems.

*[1] Available through a Schneider Electric distribution channel.

82

Management System for the Entire Building*[2]

The smarter solution to simplify energy management, optimise building efficiency and drive savings.

Plug and Play BMS connection.

With the SER8150, connection to BMS is extremely easy. Better still, a remote controller is all that's needed to enable use as a stand-alone system. In addition to dramatically reducing the burden on system integrators, this cuts costs.

Smart Management Solutions

1 Hotels

Room Key Card or Key Cardless Solutions for Hotels

The SER8150 and ZigBee Sensor automatic detection function offer optimal air conditioning regardless of whether there is a hotel room key or not. Sensors detect the presence or absence of occupants and the opening and closing of doors and windows for the optimum air-conditioned environment guests expect. Automatic control ensures the most efficient operation when guests are away or when windows are open. This contributes to an appreciable reduction in operation costs.

1. Remote sensing & IAQ contorol

In addition to detecting a room's temperature, humidity and CO_2 concentration, ZigBee remote sensors detect the opening/closing of windows and doors, and the presence/absence of people in a room.
Various IAQ controls and detailed energy savings are possible by using SE8350 based on this detected information.
2. BMS Connectivity

By setting HRC*[1] as the guestroom controller, sensing, control and BMS connection can be realized in coordination with SER8150!
3. Key Cardless control

The introduction of SE8350 and HRC enables conventional wired keycards to be connected to the system so that it is possible to meet the specific requirements of various hotel and room types.
4. Other control

The introduction of SE8350 and HRC enables the on/off control of devices having dry contact input, such as ventilation, lighting and blinds.

*[1] Available through a Schneider Electric distribution channel.

---
2 Small and Medium Offices

CO_2 sensors (option) and Humidity sensors

CO_2 sensors (option) take measurements in units of ppm, and humidity sensors enable fine air quality control. This creates the most comfortable space for occupants while contributing to improved employee satisfaction.

3 Super Markets

Humidity sensors

Humidity sensors enable automatic dehumidification for the optimum IAQ regardless of climatic conditions. This creates an even more comfortable environment for customers, employees, and products themselves.

Innovative and Unrivalled Advantages

Colour and Design to Match Office Interiors
Colour combinations and design can be set to match different facilities.

Customisation in 22 Languages Possible
The display can be customised to match the native languages of guests to enable smooth, stress-free communication for hospitality at its finest.

Easy-to-Understand Error Description
Error description during an emergency is easy to understand, enabling staff to respond quickly.

Programmable Logic
Full customisation of remote control logic possible, and updating to match conditions.

Less than 1.0 % yearly (typical drift)
Wiring
Maximum wire length between last indoor unit to SER8150RxB1194 equals 490ft (150m) with AWG #18 wire (0.82 mm²). Refer to Panasonic VRF guidelines "Wiring System Diagram for Remote Controller" for this limitation.
Approximate Shipping Weight
0.34 kg (0.75 lb)

THIS PRODUCT FOR COMMERCIAL USE ONLY

Water Leakage Sensor

Dimensions
Specifications

Dimensions	70.8mmx66.7mmx19mm
Colour	White
Weight	64g
Communication	ZigBee 3.0 HA
Battery Voltage	3V
Battery Cell	LR03 AAA (2pcs)
Battery Life	Up to 5 years
Rated Power	≧ 90 mW
Maximum Transmitted Power	≧ 5 dBm
Ambient Temperature	-10° ~ +50°C
Frequency Band	2405–2480 MHz

Certification

Check with your local government for instruction on disposal of these products.

Wall/Ceiling Wireless Sensor SED-MTH-G-5045

Dimensions
Specifications

Dimensions	70mm diam...x26.6mm
Colour	White
Weight	59g
Communication	ZigBee 3.0 HA
Detection Range	Ceiling: Ø4m (installation height 2.5m) Wall: R5m (installation height 1.2m)
Battery Voltage	3V
Battery Cell	LR03 AAA (2pcs)
Battery Life	Up to 5 years
Ambient Temperature	-10° ~ +50°C

Certification

Check with your local government for instruction on disposal of these products.

Door/Window Wireless Sensor SED-WDC-G-5045

Dimensions

Master part
Slave part

Specifications

Dimensions	Master part: 50mmx33mmx16.3mm Slave part: 50mmx9mmx9mm
Colour	White/transp.
Weight	30g
Communication	ZigBee 3.0 HA
Detection Range	Trigger 'close': wood 30mm, metal 18mm Tigger 'open': wood 32mm, metal 20mm
Battery Voltage	3V
Battery Cell	CR2450
Battery Life	Up to 5 years
Ambient Temperature	-10° ~ +50°C

Certification

Check with your local government for instruction on disposal of these products.

CO₂ Sensor SED-CO₂-G-5045

Dimensions

DETAIL L
SCALE 2:1

SECTION F-F

SECTION E-E   SECTION D-D
Specifications

|	
Dimensions	3.26in x 2.85in x 0.72in 82.9 mm x 72.4 mm x 18.4 mm
Operating Temperature	0°C to 50°C (32°F to 122°F)
Temperature Accuracy	±0.3°C (0.54 °F) typical within operating range
Humidity Range	0% to 100%
Humidity Accuracy	± 3% RH (typical within 0% to 80% RH)
Measurement Range	0 to 5000 ppm
Measurement/ Transmission Intervals	2.5 minutes (day), 10 minutes (evening) Note: Battery life will be reduced should interval be shortened (i.e. using remote temperature/humidity functions)
CO2 Accuracy at NTP	±60ppm +3% of reading (400 – 2,000ppm range)
Communication	Zigbee 3.0 Green Power (encrypted, bi-directional)
Battery Voltage	3.6 V
Battery Cell	AA Lithium ion
Battery Life	10+ years (non-replaceable) Note: Battery life can be reduced when sensor is operated at temperatures approaching the operating limits.
Ambient Temperature	-30°C to 70°C

Certification

Check with your local government for instruction on disposal of these products.

SE8350 [*2]

Dimensions

120mm (4.72")

86mm (3.39")

25mm (0.99")

Main Specifications

Item	Description
Dimensions	12cm/4.72in (H) x 8.6cm/3.38in (W) x 2.5cm/1in (D)
Power Requirements	Input: 24VAC ±15% recommended, Absolute Max 29.5VAC, 50/60Hz or 24Vdc ±15% Peak device consumption: up to 6VA with CO2 sensor or Wi-Fi module Plus Output Load (max total 94VA) Transformer maximum rating: 100VA, 4.17 A
Output Ratings	**Nine Electronic Relays** : 24VAC or 24Vdc ±15% same as input power, 1.0 Amp., in-rush = 3.0 Amps; **Four Analog Outputs** : 0 – 10 Vdc, 5mA maximum, (2 kilo-ohm resistance) Configurable Output Analog/Electronic Relay
Operating Conditions	0 °C to 50 °C (32 °F to 122 °F) 0% to 95% R.H. non-condensing
Storage Conditions	-30 °C to 50 °C (-22 °F to 122 °F) 0% to 95% R.H. non-condensing
Temperature Sensor	Local 10 K NTC type 2 thermistor
Temperature Sensor Resolution	± 0.1 °C (± 0.2 °F)
Temperature Control Accuracy	±0.5 °C (± 0.9 °F) @ 21 °C (70 °F) typical
Humidity Sensor Precision	Reading range from 10-90 % R.H. non-condensing 10 to 20% precision: 10% 20% to 70% precision: 5% 70% to 90% precision: 10%
Humidity Sensor Stability	Less than 0.25 % yearly (typical drift)
Dehumidification Setpoint Range	30% to 95% R.H.
Occ, Unocc and Standby Cooling Setpoint Range	12.0 °C to 37.5 °C (54 °F to 100 °F)
Occ, Unocc and Standby Heating Setpoint Range	4.5 °C to 32 °C (40 °F to 90 °F)
Room and Outdoor Air Temperature Display Range	-40 °C to 50 °C (-40 °F to 122 °F)
Proportional Band for Room Temperature Control	Cooling and Heating: Default: 1.8°C (3.2°F)
Analog Inputs	Modulating 0-10 VDC across UI19, UI24 to Common
Binary Inputs	Dry contact across terminals UI16, UI17 to Common
Remote Temperature Sensor	10 K NTC type 2 thermistor UI20, UI22, UI23
Wire Gauge	Power supply: 16 or 18 gauge Communications: 22 gauge typical, 24 gauge minimum
Shipping Weight	0.34 kg (0.75 lb)

[*2] **SE8350 does not connect directly to the air conditioner itself**

Hotel Room Controller HRC[*1]

Dimensions

144mm/5.6in

110mm/4.3in
Specifications

Dimensions	5.6in x 4.3in x 2.4in 144mm x 110mm x 60.5mm
Digital Inputs	12
High Voltage Relay	10 x 3 A SPST +250 VAC relays
Digital Outputs	
Analog Inputs	12 x configurable analog inputs DI: voltage free DI, 10 kΩ input impedance 0-20mA: range 0..1000, < 150 Ω impedance 0-10V: range 0..1000 > 10 kΩ impedance
Analog Outputs	6 x 0-10 V outputs. Load impedance > 700 Ω
Supply Voltage	24 VAC + 10% NOT ISOLATED +20...38 Vdc NOT ISOLATED
Supply Frequency	50/60 Hz
Power Cycle	35 VA / 15 W
Operating Temperature	-20 to 60 °C (-4 to 140 °F) conforming to UL 60730-1
Storage Temperature	-30 to 70 °C (-22 to 158 °F)

Panasonic AC Smart Cloud

With Panasonic AC Smart Cloud, have your business under control, and start saving!

Flexible and scalable solution

· Energy saving
· Zero downtime
· Site(s) management

Centralise control of your business premises, from wherever you are, 24/7/365.
It doesn't matter how many sites you have, or where they are!
The AC Smart Cloud system from Panasonic allows you to have complete control of all your installations, from your tablet or from your computer.
In a simple click, all your units from several locations, receive status updates in real-time of all your installations, preventing breakdowns and optimising costs.

Flexible solution for your business.

Every time	Everywhere	Multiplatform	Internet browser

Scalable solution for your business.

Small to large	1 to multi sites	Upgrade features*1	PAC / VRF

*1 Customised to meet user demand / Continuous upgrades: new functions and product introductions / IT smart management.

Panasonic AC Smart Cloud offers continuous improvement always thinking about users

New e-CUT function
E-CUT functions are newly available in Panasonic AC Smart Cloud.
5 energy saving settings reduces automatically its energy consumption.

1. Set temperature auto return.
When you want to return to the set temperature after a certain time even if the temperature is changed.

30 minutes later   30 minutes later
28°C
22°C
Change | Return! | Change | Return!

2. Unattended auto shut OFF.
When you want to operate outside of a schedule but to monitor and stop automatically.

Time set for unattended auto shut OFF
Detect 60 min. | Detect 60 min. | Detect 60 min.
21:00   22:08   23:00   9:00 ON
AUTO OFF | MANUAL ON | AUTO OFF | MANUAL ON   OFF
Forget to turn OFF

3. Set temperature range limit.
When you want to limit the temperatures that can be set.

18°C 20°C 22°C 24°C 26°C 28°C 30°C
High | Electricity or gas consumed | Low
Reduced consumption of electricity or gas by over cooling. | Set temperature restricted to the range between 26°C and 30°C.

4. Energy saving timer / Efficient operation setting.
Specify time slots when you want operation capacity reduced.
High
Electricity or gas consumed
Low
10:00 12:00 13:00 15:00 Time

5. Demand / peak shaving settings/ Peak cut settings.
Specify time slots when you want operation capacity of the outdoor units reduced.
High
Electricity or gas consumed
Low
10:00 12:00 13:00 15:00 Time

Key functions and uniqueness

Multi site monitoring
• It doesn't matter how many sites you have, easy to manage, operate, compare sites, locations, rooms.

Powerful statistics for energy savings
· Power consumption, capacity, efficiency level can be compared with different parameters (Yearly / monthly / weekly / daily bases)

Schedule setting
• Yearly / weekly / holiday timer setting as you want

Maintenance notification
· Error notification by email and with floor layout
· Maintenance notification of PAC / VRF outdoor units
· Remote service checker function

User customisation*2
Site administrator can create users as desired and assign customised profiles.

New service checker interface

The new service checker interface provides easy access to service parameters and service checker data via Bluetooth®.
• A new service checker interface[4] for PAC NX Series
• Bluetooth® connection
• Panasonic H&C Diagnosis App

[4] Available as a spare part, compatible with new PAC NX Series.

Input voltage	220-240 V ~ 50-60 Hz (supplied from outdoor unit)
Power consumption	Maximum 2,4 W (including outdoor units)
Size (H x W x D)	175 x 125 x 50 mm
Weight	—
Interface	Bluetooth® 4.2 or later
Frequency range	2,4 GHz band
Operation range - Temperature / Humidity	0 ~ 40 °C / 20 ~ 80 % (no condensation)

* Frequency band in which the ratio equipment operates; 2402 - 2480 MHz.
* Maximum radio-frequency power transmitted in the frequency bands in which the ratio equipment operates; +0 dBm.

*New Zone controller (CZ-RTC6Z) can be connected with 3.6 kW to 22.4 kW Ducted (PE3 and PF3) Indoors and VRF Ducted (M1, E1, E2, E1R, F2, F3 and Z1) Indoors.
*Connectable to selected Panasonic ducted models only, please consult Panasonic for more details

Timer remote controller (CZ-RTC4)

Dimensions
H 120 x W 120 x D 20 mm

Basic remote controller ON/OFF
• Operation mode changeover
  (Cooling, Heating, Dry, Auto, Fan).
• Temperature setting
  (Cooling / Dry: 18-30 °C Heating: 16-30 °C).
• Fan speed setting H / M / L and Auto.
• Air flow direction adjustment.
• ECONAVI on / off*²

Time Function 24 hours real time clock
• Day of the week indicator.

Weekly Programme Function
• A maximum of 6 settings/day and 42 settings/week
  can be programmed.

Outing Function
• This function can prevent the room temperature
  from dropping or rising when the occupants are out
  for a long time.

Sleeping Function
• This function controls the room temperature for
  comfortable sleeping.

Maximum 8 indoor units can be controlled from one remote controller

Remote control by main remote controller and sub controller is possible

Maximum 2 remote controllers (main remote controller
and sub controller) can be installed for one indoor unit.

*² Depending on the model, some menus cannot be used.

Note: Product images not to scale.

Wireless remote controller

For 4-WAY
Cassette type
CZ-RWS3
+CZ-RWRU3

For all Ducted types
CZ-RWS3
+CZ-RWRC3

For Under Ceiling type
CZ-RWS3
+CZ-RWRT3

Remote control by main remote controller and sub controller is possible
• Maximum 2 remote controllers (main remote controller and sub controller) can
  be installed for one indoor unit.

When CZ-RWS3+CZ-RWRC3 is used, wireless control becomes possible for all indoor units
• When a separate receiver is set up in a different room, control from that room
  also becomes possible.
• Automatic operation by means of the emergency operation button is possible
  even when the remote controller has been lost or the batteries have been
  exhausted.

In addition, there are other functions such as temperature setting, operation switching, wind direction/fan speed setting, etc

Ventilation independent operation is possible
When commercial ventilation fans or heat-exchange ventilation fans have been
installed, they can be operated with this remote control (interlocked operation
with the indoor unit or independent ventilation ON/OFF).

Wired remote controller (CZ-RD52CP)

Note: Product images not to scale.

T10 Terminal for External Control
(Digital Connection)

Connecting an indoor unit to an external device is easy.
The T10 Terminal featured in the electronic circuit board of all indoor units enables digital connection to external devices.

1. T10 Terminal Specification (T10:CN061 at indoor unit PCB)

• Control items: 1. Start/stop input
2. Remote controller prohibit input
3. Start signal output
4. Alarm signal output
300msec. or more
1-2 (pulse input)
4-5 (output) +12
Unit condition   ON   OFF   ON

NOTE: The wire length from indoor unit to the Relay must be within 2.0m.
Pulse signal changeable to static with JP cutting. (Refer to JP001)

• Example of wiring

```
        1
   COM  2
        3
        4
   COM  5  +12V
T10     6
(yellow)
```
Condition

1. 1-2 (Pulse input): Unit ON/OFF condition switching with a pulse signal. (1 pulse signal: shortage status more than 300msec.or more)
2. 2-3 (Static input): Open/ Operation with Remote is permitted.(Normal condition) Close/ Remote controller is prohibited.
3. 4-5 (Static output): 12V output during the unit ON. / No output at OFF.
4. 5-6 (Static output): 12V output when some errors occur / No output at normal.

2. Usage Example

Forced OFF control

• Condition

1-2 (Static input): Close/ Operation with Remote is permitted. (Normal condition) Open/ Unit is forcibly OFF and Remote controller operation is prohibited.

• Example of wiring

T10 (YEL) Relay (Field supply)
Indoor unit control PCB   POWER   External contact (Card switch box, etc.: field supply)
• The contact in the figure is a state where the card is pulled out.
Note: The wire length from indoor unit to the Relay must be within 2.0m

Operation ON/OFF signal output

• Condition

4-5 (Static output): 12V output during the unit ON / No output at OFF

• Example of wiring
T10 (YEL)   Relay (Field supply)
Indoor unit control PCB   Central control
2 m

Note: The wire length from indoor unit to the Relay must be within 2.0m
Pulse signal changeable to static with JP cutting. (Refer to JP001)

ECONAVI

Reducing inefficient air conditioning

Providing outstanding energy-saving performance, Panasonic's large capacity air conditioners can be connected to ECONAVI to detect when energy is being wasted.
ECONAVI senses the presence or absence of people and the level of activity in each area of a room. When unnecessary heating or cooling is detected, indoor units are individually controlled to match room conditions for energy-saving operation.

ECONAVI Sensor
CZ-CENSC1

• please check specific models for compatibility

How 2 sensors work for human detection

Detection of the level of activity enables optimum power saving

Presence or absence of people and the level of activity in the room are detected in real time. Set temperature is automatically adjusted to optimise the power consumption.

Case study at coffee shop

In the morning
Reduced cooling when there are fewer people.

In the afternoon
Thorough cooling when there is a high level of activity.

At night
Automatic Thermo Off depending on conditions at the end of the day.

Sensors are remotely located to maximise the energy-saving effect

When sensors are built into the indoor unit, pillars, walls, cabinets and other fittings can obstruct the sensors, reducing the area of detection and lowering the energy-saving effect. Panasonic sensors can be located any where in the room which enables the optimum layout for sensors in any location.

Wide detection area

Wide 120°
2.5m
Dead Zone
Detection area
Approx 1m
7m
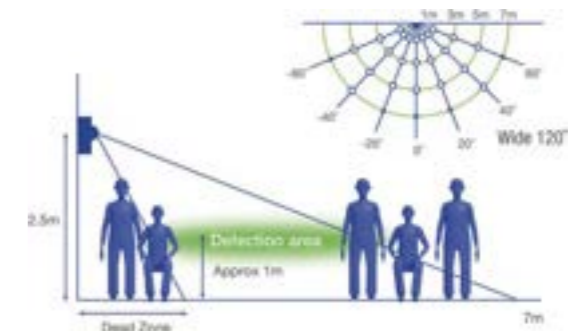

A sensor is remotely set to maximise the detection area.

Installation flexibilitydy for indoor unit layout changes.
