SYSTEM HIGHLIGHTS

The human voice is still the best way to communicate. With the Panasonic KX-TVM50AL and KX-TVM200AL, Panasonic introduces two feature-packed Voice Processing Systems (VPS) designed for efficient communication.

The KX-TVM50AL and KX-TVM200AL each offer Automated Attendant Automatic Call Routing and Message Notification, each can be customised to your needs.

Other new features include Email Notification and Voice Mail Menu using the LCD on Panasonic Proprietary Telephones (PT).

With the KX-TVM50AL and KX-TVM200AL, Panasonic delivers new levels of communication ease and efficiency that can help any business be more productive.

System Expansion

When your business grows, you need a Panasonic Voice Processing System that can grow with you. As your needs change over time, the KX-TVM50AL and KX-TVM200AL can be expanded to keep up with

your increased call traffic. The KX-TVM50AL comes equipped with 2 ports, capable of handling 2 calls at once. This entry level system is ready to satisfy small scale voice mail needs right out of the box and can be expanded to 6 ports, handling 6 calls at once. Recording time can also be doubled by adding a KX-TVM524 4-Hour Recording Time Expansion Card. The larger-scale KX-TVM200AL can be expanded to 24 ports, handling 24 calls at once. Recording time is an incredible 1000 hours.

Voice Mail (VM) Menu on the LCD

For easier operation, Voice Mail menus and the number of new messages received can be displayed on the LCD screens of Proprietary Telephones. Users can retrieve messages or specify parameters.

Custom Service

Using Custom Service, you can give callers 1-digit access to department extensions, special announcements and other information. The caller listens to the first Custom Service menu, then selects from the options available.

Thank you for calling Panasonic.
For English, press 1.
For Spanish, press 2.

For information on new products, press 1.
For technical support, press 2.
For information on training courses, press 3.
To send us a fax, press 4.

E-Message

Even while you are away from the office, the Panasonic Voice Processing System will make sure you never miss a message. You can configure the system to notify you by email when you have received new messages; you can then log in to your mailbox remotely and listen to your messages. Better yet, have the system send your new messages in telephone-quality WAV file format as email attachments and listen to your messages without even picking up the phone! You can easily forward them by email to other parties and keep backup copies of those messages on your PC. Calling the office to check your messages is finally a thing of the past.

STANDARD FUNCTIONS

Voice Mail Service

The KX-TVM50AL provides 64 password-protected mailboxes while the KX-TVM200AL provides 1024. When callers reach your mailbox, they can hear a personal greeting that you recorded and then leave a message. You can also set the system to automatically forward messages to a back-up mailbox, if desired.

Automated Attendant Service

Answers incoming calls and routes the caller to the appropriate extension or department.

Interview Service

The KX-TVM50AL and KX-TVM200AL can provide a kind of "interview service". You can record up to 10 questions and set the system up so that when someone calls, he or she is sent to the question-and-answer mailbox. The system will ask the questions and then record the caller's answers. This is ideal for such uses as taking mail orders, screening job applicants or conducting surveys.

Message Waiting Notification

This feature tells you when a caller has left a message in your mailbox. It can notify you in any of three ways:

- By lighting the "message waiting" lamp on your telephone.
- By sending a message to your beeper, either telling you to call your mailbox or actually providing the caller's number.
- By calling you at a telephone number you specified in advance.

Multilingual Voice Prompts

You can program Multilingual Voice Prompts. The opening greeting can be set to let the caller choose a language and you can even program different incoming phone lines to be answered in different languages. It's a great feature for global businesses.

Direct Mailbox Access

Mailbox owners can retrieve new messages simply by calling from your extension or pre-registered telephone number. No confusing log-in codes are required.

Automatic Message Forward / Copy Message

If messages have not been "picked up" after a specified period of time, the system can be programmed to automatically move or copy the message to another mailbox.

Holiday Service

The system can play special greetings for holidays and special service settings can be programmed.

Playback Volume / Speed Control

Subscribers can change playback volume or speed while listening to messages.

Fax Detection

When a port receives a fax call and fax tones are detected, the system will automatically transfer the call to the designated fax extension.

USEFUL PANASONIC FUNCTIONS

Caller ID Call Routing

This feature automatically sends calls from preassigned Caller ID numbers ("wild card" digits can be used) to a designated mailbox, extension or Custom Service. Routing can help your company provide better service in countless ways. For example, when an important customer rings, you can forward their call directly to your company's key contact, have calls from your client in Paris forwarded to a mailbox with a greeting message in French or have calls from family members or friends

sent to a private Custom Service menu just for them. You can even use Message Waiting Notification to call your beeper or mobile phone when someone has called and left a message in your mailbox.

Caller Name Announcement

Now, you don't even have to look at your phone to identify certain callers. With this feature, you can store pre-recorded audio messages that will be played through the telephone's handset, matching a Caller ID number that is programmed with a pre-recorded message. ✨

USEFUL PANASONIC FUNCTIONS [Continued]

Personal Greeting for Caller ID

Each subscriber can record up to four different Personal Greetings and designate up to eight Caller ID numbers to be directed to each greeting. For example, you could create one greeting message in German and designate eight German customers to it. If any of them calls while you're away from your desk, they will automatically be sent to the mailbox with the German message.

Intercom Paging

Notifies you of an incoming call, even if your extension is unanswered. The

system will put the caller on hold and use an internal or external paging function to announce, "I have a call for...". You can answer the call from anywhere in your facility by dialling a pick-up code from any system phone.

Live Call Screening

This lets you monitor incoming messages and decide whether to answer the phone or let the caller leave a message. It's like having a telephone answering machine right at your desk.

Two-Way Recording

This allows a subscriber to record a conversation (both the caller's words and the subscriber's own words) in his or her mailbox. Simply press the Two-Way Record key.

Two-Way Transfer

This allows the subscriber to record a conversation into another subscriber's mailbox. This is especially useful, for example, for companies that want their receptionists to personally record messages from callers.

KX-TVM50/200AL FEATURES LIST

PBX Integration Features

- APT Integration (KX-TVM50AL only)
- Auto Configuration*
- DPT Integration
- Direct Mailbox Access*
- Display the Number of New Messages on PT
- Inband Integration (KX-TVM50AL only)
- Intercom Paging*
- Live Call Screening*
- Timed Reminder Setting
- Voice Mail Menu

Client Application

- Custom Service Builder
- Windows-based Administration

LAN Features

- Email Integration (E message)

Subscriber's Features

- Auto Play Message
- Auto Receipt
- Bookmark
- Call Transfer Status
- Caller ID Screening*
