# CLEAR, CONSTANT AND COST-EFFECTIVE COMMUNICATIONS

The world of work may change constantly, and you might find yourself working at your desk, in a meeting, at home or on the move, but one thing remains constant – the need to stay in contact with colleagues, customers and partners.

Panasonic's Communications Assistant Mobile (CA Mobile), developed in conjunction with software partner, Poltys Inc., is a response to this business-critical need. When connected to the Panasonic KX-NS1000 business communication server, this mobile client gives you unified communications functionality – voice call, chat, presence-sharing and desktop integration – with just one application.

So wherever you or your mobile workforce is operating, communication remains clear, constant and cost-effective.

## PROFESSIONAL STANDARD VOICE

With CA Mobile, voice communications are straightforward and simple to set up. Acting as a PBX extension, it offers a wide range of integrated functionality.

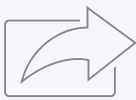

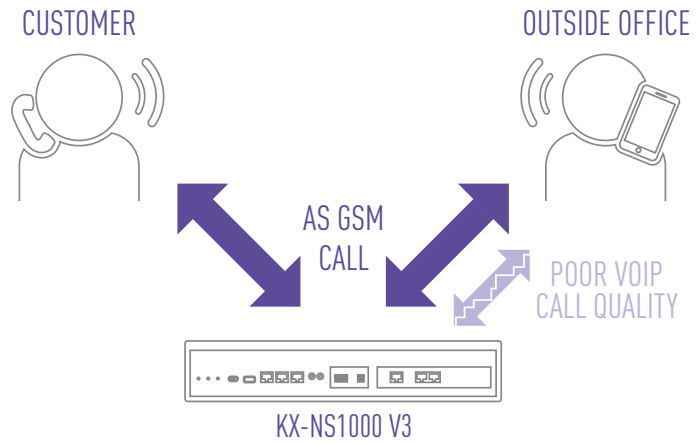

- Hold and unhold
- 'Follow Me' (automated call back to mobile phone)
- Transfer – attended and blind
- Automatic change of greeting, call forwarding and do not disturb based on presence
- Voicemail

## FOLLOW ME – THE COST-SAVING COMPANION

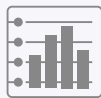

Thanks to the Follow Me function, you benefit from reduced call charges and improved call clarity. The system allows your mobile users to make and receive calls via a PBX, wherever they are, without incurring any of their own call charges, reducing your overall cost.

It's also an extremely effective tool when a data connection is available but VoIP calls aren't or when voice quality is poor. So your customers never experience anything less than professional standard communications.

### IMAGE/FILE SHARING

You can share images and files using CA Mobile contacts from your address book or during an active chat.

### ACTIVITY LOG

A log of activities, which includes calls (incoming and outgoing voice or video), voicemail calls, chats, and image and file transfers, allows you to redial any voice, video or voicemail call directly from the log.

### ICD GROUP LOGIN/LOGOUT

Users can login to or logout from different ICD groups defined in the PBX.

### PRESENCE INTEGRATION BASED ON ABSENT MESSAGE

UM greeting changes when absent message changes.  
FWD/DND changes when absent message changes.  
Feature number is dialed when absent message changes.

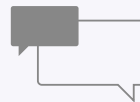

### VIDEO CALLS

Video communications are an increasingly valuable feature of business life today. With CA Mobile, making and receiving video calls easy and effective, with the ability to switch between voice and video calls in a single tap.

### CONTACT LIST

Your important contacts are always with you, thanks to CA Mobile. The system means you can add or edit your own contacts, start chat (text-based) conversations and download contact extension lists from the KX-NS1000.

### CHAT

The chat feature means you can have quick and easy conversations via mobile or desktop with any of your contacts – ideal if you don't have much time or the setting isn't ideal for a voice conversation.

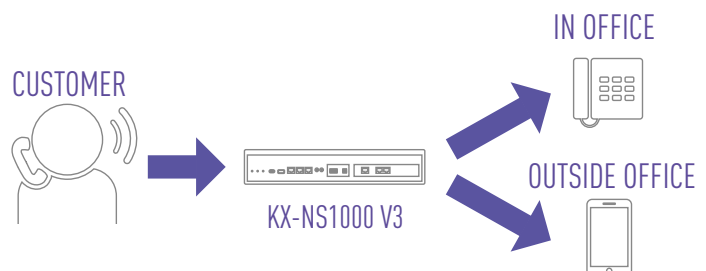

### PRESENCE SHARING

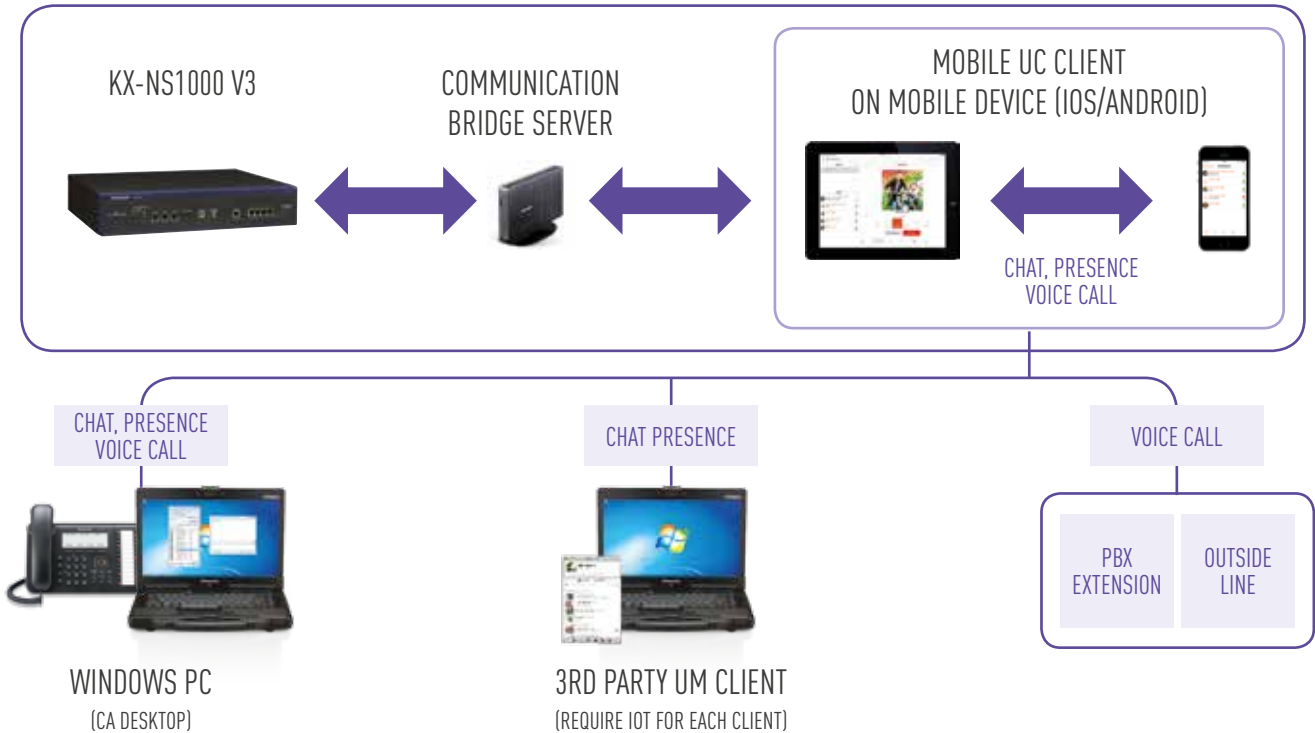

This valuable function removes the frustration of being unable to contact people and allows you to decide when and how to get in touch. You can see at an instant whether people are online, unavailable, busy or offline before you attempt to contact them.

## COMMUNICATION ASSISTANT DESKTOP INTEGRATION

One of the most valuable features of CA Mobile is its ability to integrate with Panasonic CA Desktop. This means a desktop and mobile device can be paired as a single number extension. So calls are never missed, mobile users maintain connection with central information and your customers need only know one number to contact.

## HOW THE SYSTEM WORKS

## WHAT DO YOU NEED?

KX-NS1000	Communication bridge server	Mobile client Poltys CA RCS
Version 3.2 or later	<ul style="list-style-type: none"> <li>• Software installed on server</li> <li>• Pre-installed model available</li> </ul>	Software installed on smartphone/tablet

## OS REQUIREMENTS FOR MOBILE CLIENT (POLTYS CA RCS)

Version	iOS	Android
