[2] Connect your camera and smartphone

Pair the "LUMIX Sync" smartphone app with your camera in advance with Bluetooth.

[Initial screen after installing the "LUMIX Sync" smartphone app]

[Set the connection of the camera and smartphone with Bluetooth]

[Select the camera]

[Pairing may take a few minutes]

Pairing completed

LUMIX Sync

THREE WAYS to live stream using the “LUMIX Sync” smartphone app

[1] Streaming with RTMP/RTMPS

Setting method for live streaming using stream URL and stream key. In addition to YouTube and Facebook, it is possible to configure settings with various social streaming platforms that are compatible with RTMP/RTMPS.

**When you wish to schedule a post or if you have less than 1,000 subscribers on YouTube, connect with RTMP/RTMPS.*

Check

3 ~ 4

[2] Streaming with YouTube LIVE

This is a setting method to easily conduct live streaming by logging into your YouTube account so that you can omit inputs such as stream key.

Caution Due to YouTube's Terms of Service, this setting is only possible if you have over 1,000 subscribers.

Check

5 ~ 6

[3] Streaming with Facebook LIVE

This is a setting method to easily conduct live streaming by logging into your Facebook account so that you can omit inputs such as stream key.

Check

7 ~ 8

•Live streaming to the platforms that comply with RTMP/RTMPS is basically possible (Compatibility with all the platforms is not guaranteed.) There may be the cases where the live streaming is not possible when the service of the platform changes. For more information, please refer to the terms and conditions of the platform.

•YouTube™ and the “YouTube logo” are registered trademarks of Google Inc. •Facebook™ is a registered trademark of Facebook, Inc

Stopping and ending streaming

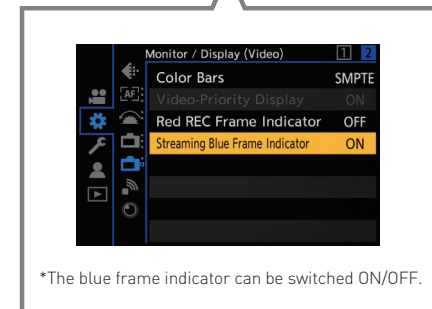

[Stop live streaming]

[End live streaming]

[Return to
the top screen]Announce the URL
with social media,
email, etc.

*The blue frame indicator can be switched ON/OFF.

Live streaming by operating the camera

Set the streaming destination with your PC and save onto an SD memory card.
Insert the card into your camera and start live streaming by loading the streaming settings onto your camera.

STEP
1

Install the LUMIX Network Setting Software onto your PC

Download the software
and install it onto your PC

[Prepare your PC]

PC software
[LUMIX Network Setting Software]

Download site
<https://panasonic.jp/support/dsc/download/index3.html>

Supported OS (as of September 2021)
Windows: Windows 10
Mac: macOS 10.13, 10.14, 10.15.3-10.15.7, 11.0-11.2

Insert an SD card into your PC

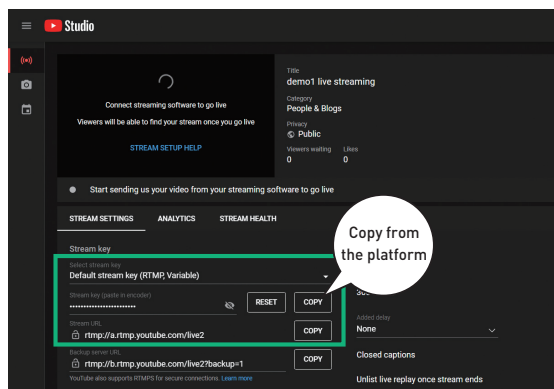

STEP 2

*Please use an SD memory card with free space.
*If your PC does not have an SD memory card slot, use an SD card reader.

STEP
2

Obtain the streaming content settings from the platform

! Obtain the URL
from the platform

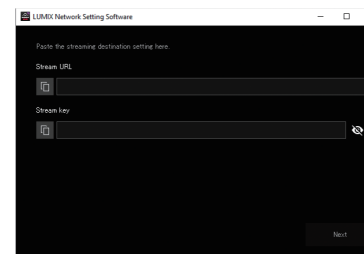

■ Login to your account.

[Configure settings from
the social streaming platform]

Set the privacy settings and date and time.
Set other details.

★ Copy the stream URL
★ Copy the stream key

Input to the LUMIX Network Setting Software

[Launch the LUMIX Network
Setting Software]

[Paste the stream URL and
stream key that you copied]

STEP 3
NEXT PAGE

*Here we will be explaining using the YouTube LIVE (YouTube Studio) settings as an example.

Live streaming by operating the camera

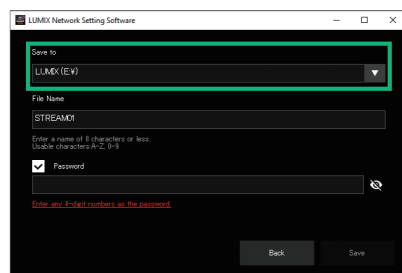

Set the streaming destination with your PC and save onto an SD memory card.
Insert the card into your camera and start live streaming by loading the streaming settings onto your camera.

STEP
3

Export from the LUMIX Network Setting Software to the SD card

Insert the SD card into your camera and start settings

[Settings file]
STREAM01.STM

Save to
the SD memory card

STEP 4

[Export the streaming destination onto the SD memory card]

- Characters that can be set in "File Name": Alphabet (uppercase), numbers, up to 8 characters.
- To prevent usage from a third party, you can secure the streaming destination with a password.
 - Put a check mark in "Password".
 - When you set a password, password input will be required when loading the streaming destination.
 - You can enter any 4-digit numbers as the password.

STEP
4

Load the streaming destination inside the SD card to your camera

Select
