Simple and Slim Design

- Minimalistic flat design
- Minimized thickness of louver
- Integrated into the ceiling seamlessly

Silent Stream Fan

- Optimized airfoil curve
- Increased blade size

Advanced aerodynamic principle applied on blade shape

1. Increase the air volume by matching the airflow

2. Lower the noise by evening the airflow velocity

1. The value of power consumption, air volume and noise are specified at the static pressure of 0 Pa.
2. The value of air volume is the mean value which is measured by our company.
3. The value of noise level is measured at 1m apart from the left, the right and the front of product, then get the average of three values.
4. The value of noise level is A weight average sound pressure level, the mean value is measured by our company.
5. RPM data is for reference only. Values may vary subject to different condition.
