

# Detect Wrong-Way Driving within 2 seconds

## Intelligent Vehicle Incident Detection

Video Analytics Built-in PTZ camera

### Benefits :

- The camera has Video Analytics function to detect Wrong-Way Driving and Stopped Vehicle on the road.
- The alarm information is automatically sent to TMS / VMS(\*) for immediate action.
- High power 40x optical zoom with Image stabilization enables situational awareness at 1.3 times further distance than conventional 30x zoom camera.

(\*) TMS: Traffic Management System  
VMS: Video Management System

# Detect Wrong-Way Driving within 2 seconds

## Intelligent Vehicle Incident Detection

Video Analytics Built-in PTZ camera

Technical Advantage:

Wrong-Way / Stopped Vehicle Detection  
By Video Analytics built-in camera

Keep Accuracy under Challenging Condition

- High Sensitivity: 0.015 lux @color mode
- Intelligent Zoom Stabilization
- ClearSight Coating

System Connectivity

- TMS / VMS support
- H.265 compression with Smart Coding
- Onvif S/G

**Detect Wrong-Way Driving**  
**within 2 seconds**

# Intelligent Vehicle Incident Detection

Video Analytics Built-in PTZ camera

Application:

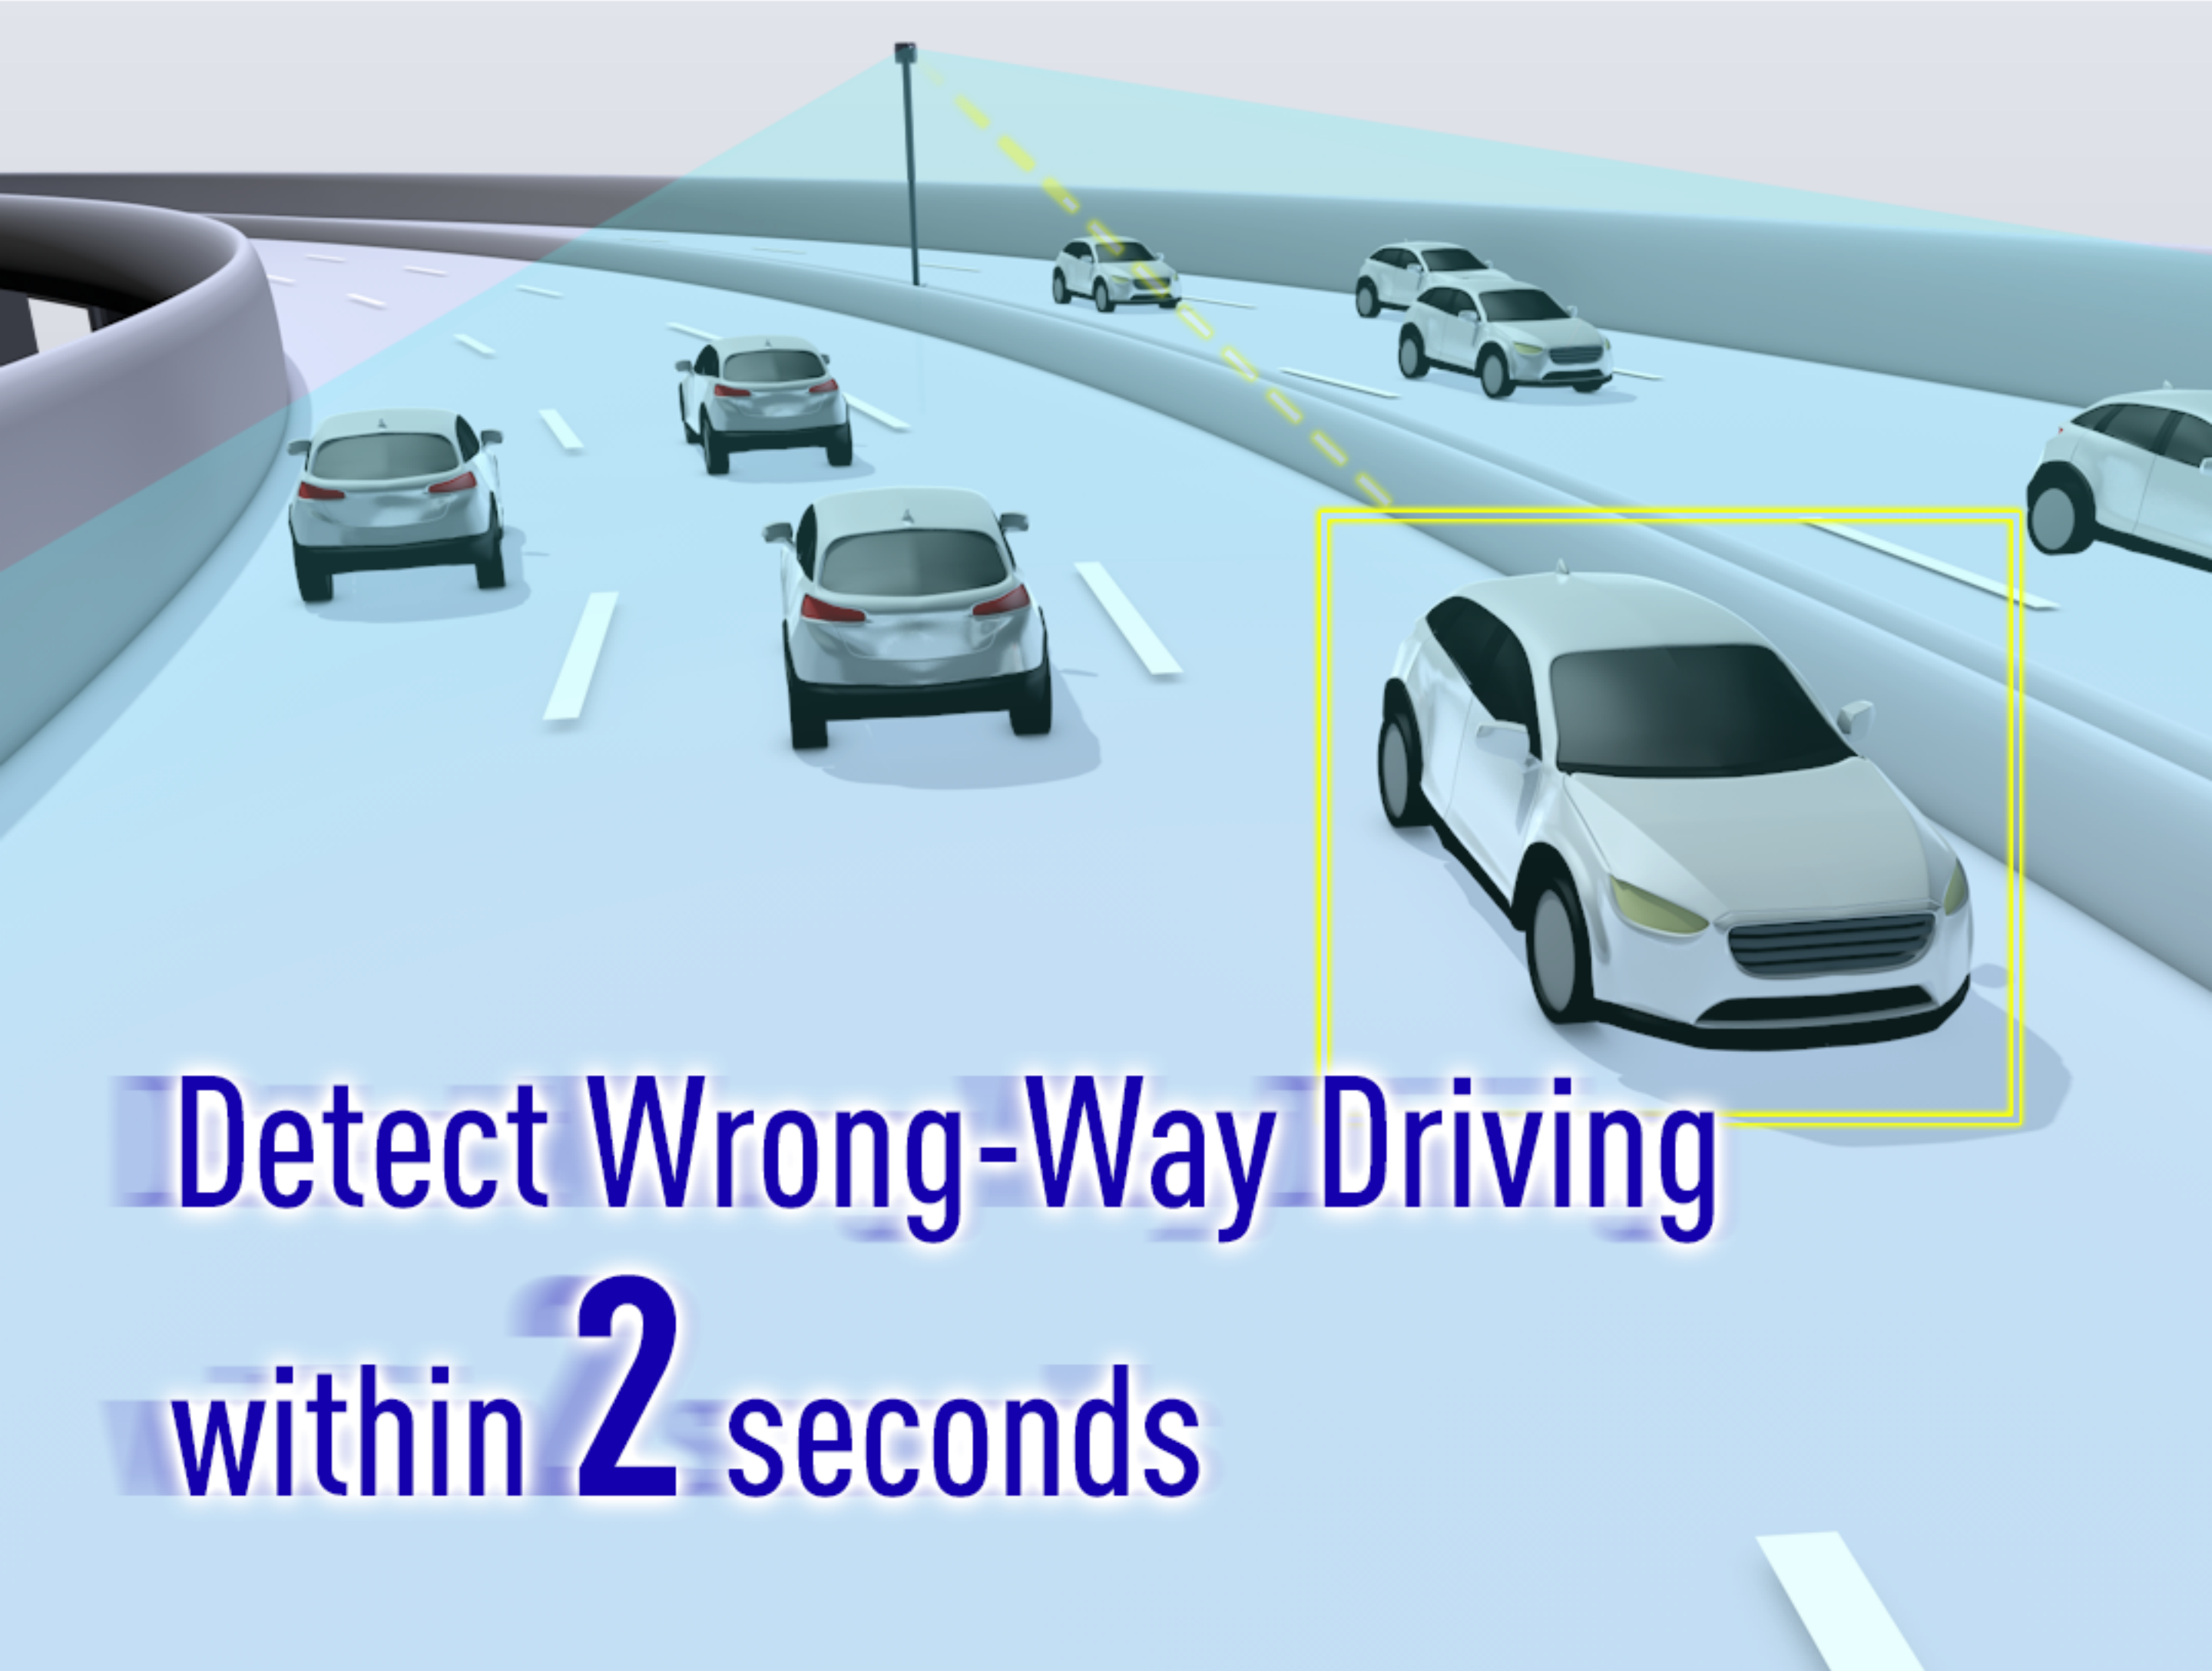

Detect wrong way driving :

Vehicle will be framed in red switching from blue

※Video used with permission from the Iowa Department of Transportation

**Detect Wrong-Way Driving**
