

ETC **65%** of the total vehicles in Japan

Fleet Management System ITS BIG DATA SOLUTIONS with ETC2.0

Benefits :

- Improving an efficiency of logistics operations for manager by monitoring logistics vehicles.
- Reducing a risk of traffic accident for drivers by analyzing individual driving characteristic.
- Getting more information on road maintenance for road manager by analyzing the traffic flow.

ETC 65% of the total vehicles in Japan

Fleet Management System

ITS BIG DATA SOLUTIONS with ETC2.0

Technical Advantage :

Big data Utilization by ITS infrastructure

- Lots of road traffic information
- Public standardized probe data

ETC2.0 on-board unit with GPS

- 5.8GHz band DSRC unit compatible ETC
- 80km probe data record (option: 200km)

DSRC roadside unit

- Collecting probe data from ETC2.0 OBU
- 3,600 spots nationwide

Field operational test for improving an efficiency in logistics vehicles management with ETC2.0

ETC **65%** of the total vehicles in Japan

Fleet Management System

ITS BIG DATA SOLUTIONS with ETC2.0

Applications :

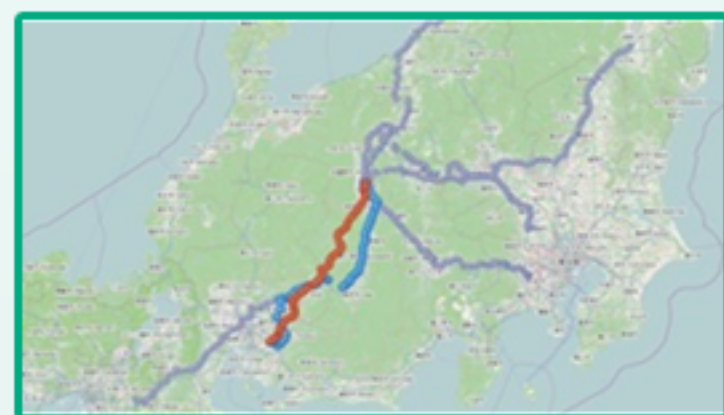

Logistics Vehicles Monitoring

- Tracking, speed, arrival / departure time etc.for logistics manager

Driving Safety Information

- Potential incident spots ($< -0.25G$)
- Ranking of drivers and spots

Road Maintenance

- Damage information of road structures and pavements for road manger

Road Usage — high — mid — low

Field operational test for improving an efficiency in logistics vehicles management with ETC2.0
