MASTERING THE MAGIC OF LIGHT AND SOUND

The Panasonic obsession with great pictures and sound reaches new heights with 2015's range of beautifully engineered hi-fi products and 4K Ultra High Definition TVs and Blu-ray players.

These are tumultuous times in the home entertainment world, as new picture and sound technologies revolutionise both the quality and delivery of the content we watch or listen to.

Films and TV shows are increasingly being made and delivered in 4K Ultra High Definition, giving you four times the resolution of normal Full HD. Music is starting to appear in CD-beating, high-resolution formats, and can also now be sent wirelessly all over your home. The traditional disc and broadcast content options are being joined by a huge surge in the popularity of streaming music and video over the Internet. Although this is all great news for consumers on one level, it also introduces

new buying challenges as people try to figure out which products make the most of this brave new world of high-definition, easy-access content; which is where the 2015 Panasonic home entertainment range comes in.

As well as striving to integrate both 'traditional' (Blu-ray, CDs, FM radio) and new (Bluetooth, video and audio streaming) content sources into a single, straightforward ecosystem, every single 2015 Panasonic product has been designed from the ground up to deliver the sort of uncompromising picture and sound quality that's been a huge part of Panasonic's DNA for generations.

For instance, Panasonic 4K UHD VIERA TVs won't just be about resolution. They'll also deliver the colour, processing and contrast talents needed to make the most of 4K, with some high-end models even securing the backing of the independent THX (TBC) quality assurance group for the way they create incredibly accurate pictures that look exactly as the director intended.

Panasonic audio products will play high-resolution formats like FLAC brilliantly, thanks to improved speaker and product design, while new Qualcomm ALLPlay products will make it easier than ever to enjoy your favourite songs wirelessly all over the house.

What's more, new interfaces for Panasonic 4K UHD TVs and audio products make them easier and more enjoyable to use, helping you find and enjoy favourite content from the unprecedentedly wide range of sources available today.

In short, as will become clear over the following pages, Panasonic's constant drive to enhance people's lives means that anyone who buys its new televisions, Blu-ray players, speaker systems, hi-fis or headphones can feel safe in the knowledge that they're getting a product of the very highest quality.

MASTERING THE MAGIC OF LIGHT

Light is the source
The glow and spectrum of colours
The shades and darkness of contrast
The power of motion
Our passion is mastering light's brilliance
Balancing its beauty
And harnessing its power
To recreate spectacular visual experiences
To fill you with wonder

MASTERING THE MAGIC OF LIGHT

TRULY ACCURATE 4K UHD PICTURES

The stunning resolution of 4K UHD is, quite rightly, taking the TV world by storm. But for Panasonic, 4K UHD is only one part of the picture quality story.

THE 4K DIFFERENCE

PICTURES LOOK LIKE REALITY

Why 4K matters

4K UHD TVs deliver four times as much resolution as Full HD TVs. As you would expect, this means you can see far more detail and texture in 4K UHD pictures, but colours also look more natural, objects look more solid and three dimensional, and the extra detail creates a greater sense of depth. Many describe the 4K effect as feeling more like looking through a window than watching a screen. Especially when all that extra resolution is backed up by the wealth of other high-end picture features Panasonic brings to its 2015 4K UHD TVs.

4K Pro

Delivering picture quality that's true to the original intention of the director has long been one of the guiding principles for Panasonic. This year that drive for total image accuracy receives its ultimate expression in an advanced Panasonic 4K TV experience called 4K Pro. This combines a brand new professional-grade 4K Studio Master Processor with custom-made Studio Master Colour panels to offer viewers pictures that really do look exactly as they're supposed to look.

Futureproof connectivity

True 4K UHD content is arriving thick and fast – and the latest Panasonic 4K UHD TVs have all the connectivity you'll need to make the most of this next generation of picture quality. This includes HEVC decoding for Amazon and NETFLIX's 4K UHD streaming services, plus HDMI 2.0 ports for the ultimate experience from external 4K sources.

4K Pure Direct

This brilliant Panasonic technology delivers 4K signals at up to 60 frames a second and with so-called 4:4:4 colour resolution, meaning that you can enjoy smoother, crisper motion and incredibly accurate and nuanced 'lossless' colours.

4K Ultra HD vs Full HD
4K Ultra HD pictures are made up of four times as many pixels as full HD ones. This means they look far more detailed and accurately coloured, as well as enjoying a greater sense of depth.

ACCURATE PICTURE PROCESSING

Resolution isn't everything. Here, we explain how the latest Panasonic TVs also excel with colour, contrast and brightness.

4K STUDIO MASTER PROCESSOR

Professional-grade picture technology delivers accurate picture processing true to the director's intentions. The panel is the canvas and the processor is the artist. Panasonic's new 4K Studio Master Processor contains our unrivalled picture processing knowhow from our reference-quality plasma TVs and our professional AV products, to deliver the best possible picture quality, remaining true to the director's intentions. Together with our Wide Colour Phosphor technology, it ensures accurate colours, fine blacks and brilliant brightness.

Conventional TV: approx. 100 registry points **Panasonic TV: approx. 8,000 registry points**
Panasonic's Accurate Colour Drive uses professional colour management techniques to ensure that colour is accurately reproduced at any brightness.

PICTURE PERFECT

QUALITY THROUGH TECHNOLOGY

MAKING COLOUR BETTER

Even on 4K UHD TVs, if colours aren't good enough you won't feel the full impact of all those extra pixels. So, Panasonic TVs are packed with a wealth of innovative colour technologies.

Studio Master Colour

LCD TVs with Panasonic Studio Master Colour panels let you experience more vibrant, nuanced and natural tones – especially during dark scenes – than you get with normal LCD screens. They do this by using new Wide Colour Phosphor Technology, which combines advanced LED backlighting with a new colour filter system to deliver up to 98% of the Digital Cinema Initiative (DCI) colour space.

MAKING CONTRAST BETTER

Nobody understands better than Panasonic that contrast is fundamental to strong picture quality, so it has brought all of its experience to bear on putting contrast at the heart of its 2015 TVs.

Local Dimming Pro

This enables TVs to improve contrast by independently adjusting the brightness of separate segments of the LED lights, ranged either

around the edge of the screen or behind the screen.

Panasonic TVs with Local Dimming Pro further improve shadow detailing in dark areas by analysing images to work out the best gradation range to allocate to separate picture 'zones'.

BRIGHTNESS MATTERS

Since everything from shadow detail to sharpness and, especially, colour benefits from having more brightness to work with, Panasonic has introduced two brightness-related innovations for its 2015 TV range.

Super Bright Panels

Displays that use new, ultra-transmissive LCD cells to deliver much greater brightness without using significantly more power.

Dynamic Range Remaster

Picture information in the brightest parts of the image is usually lost through compression during the shooting process. So, the Dynamic Range Remaster system puts this information back without compromising colours, leaving pictures looking spectacularly vivid and dynamic.

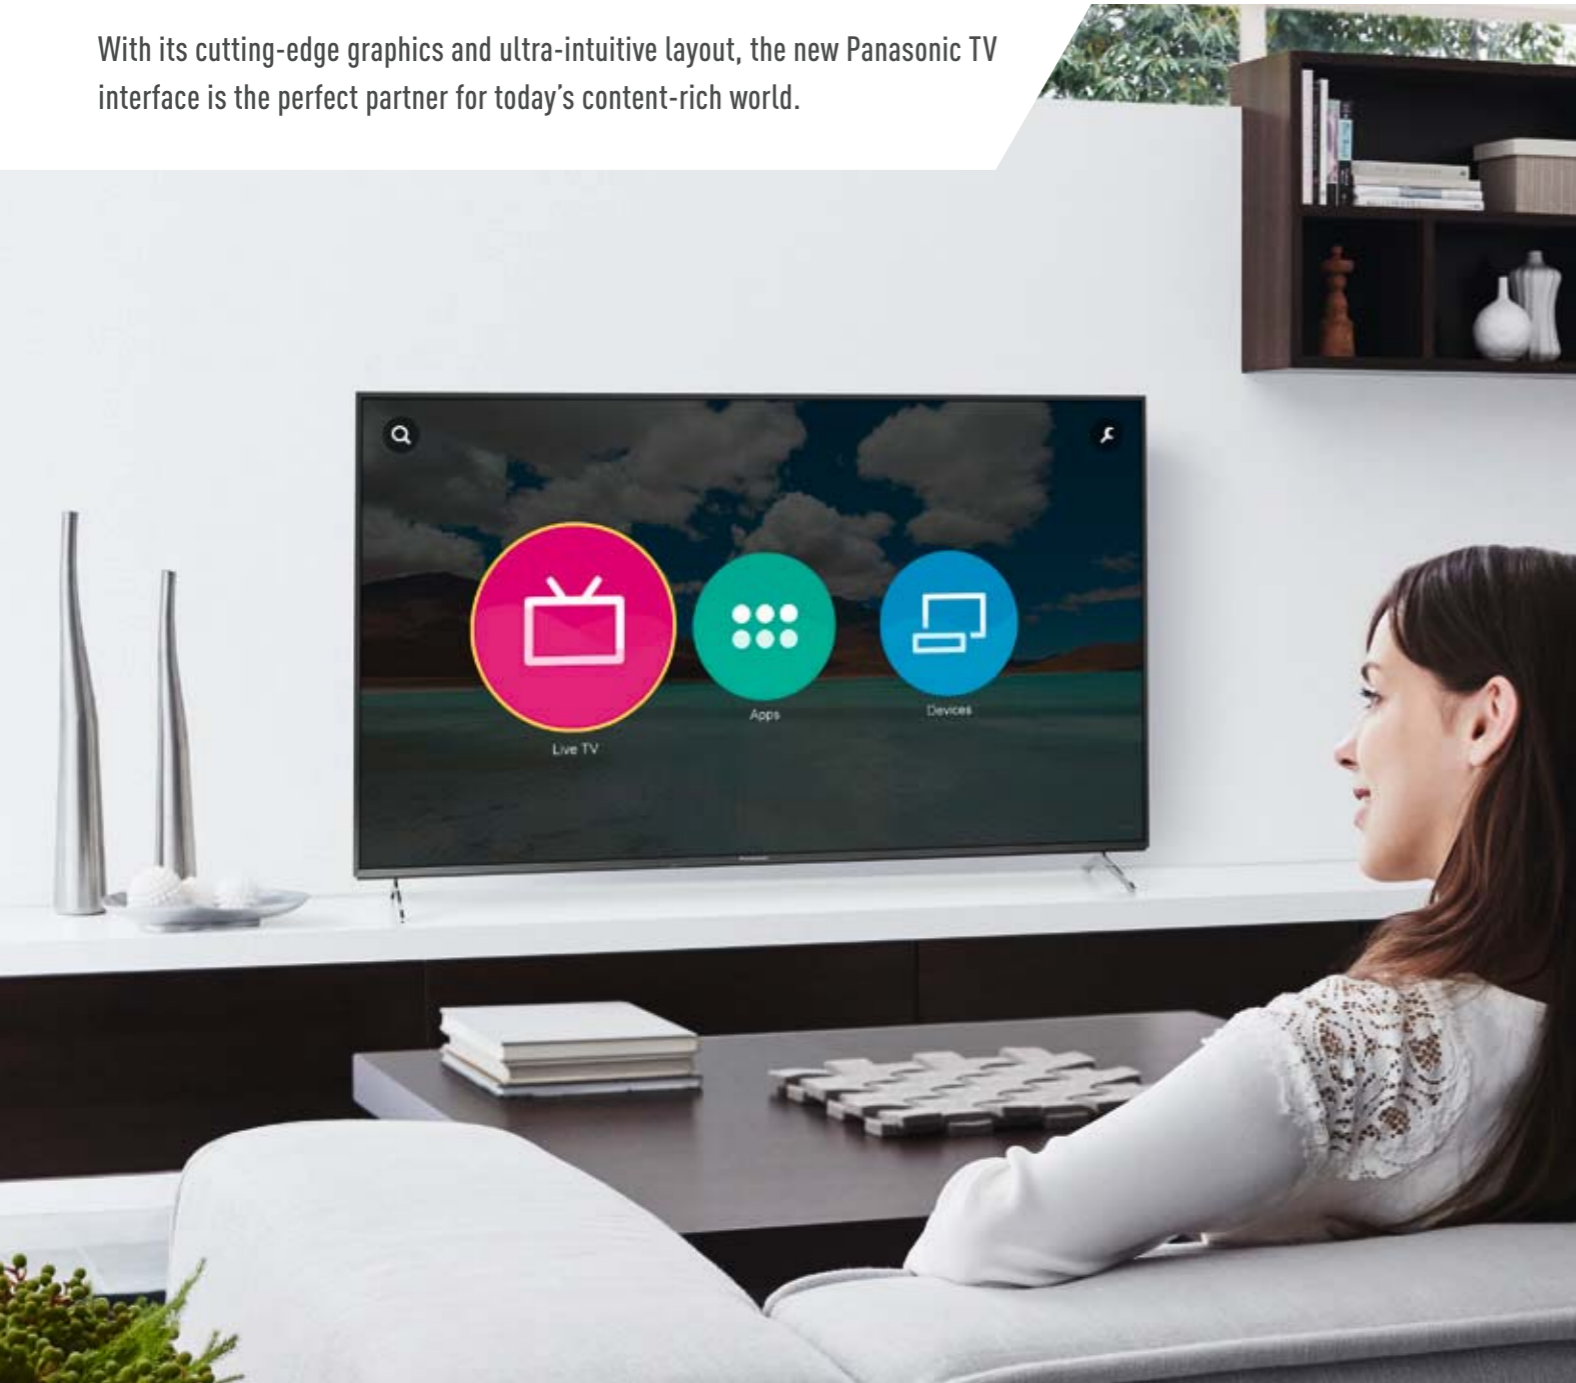

Six Steps To Brilliant Pictures
Panasonic has worked on everything from panel design to image processing to make sure its new TVs deliver truly premium picture quality.

TAKE CONTROL WITH FIREFOX OS

With its cutting-edge graphics and ultra-intuitive layout, the new Panasonic TV interface is the perfect partner for today's content-rich world.

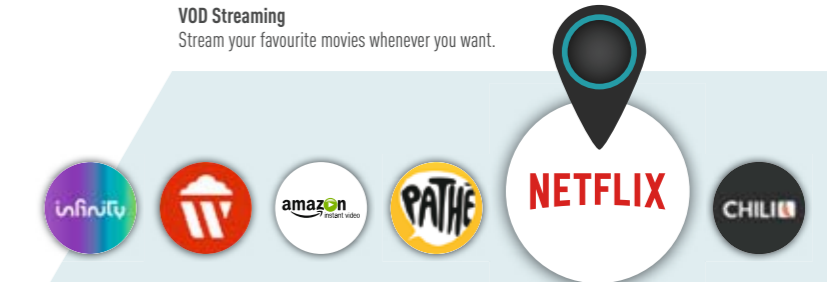

Firefox OS

MY HOME SCREEN 2.0

POWERED BY FIREFOX OS

VOD Streaming
Stream your favourite movies whenever you want.

The TV interface evolved

Panasonic has used the Firefox operating system to create a graphically rich, fast-reacting interface that makes it quick and easy to track down what you want from the huge amount of content options available today.

All hands on deck

The my Home Screen 2.0 interface divides content into easy to navigate 'decks'. There are three default decks (see the descriptions at the bottom of the page), but you can also personalise your Home Screen by pinning your favourite content apps to it.

Advanced content search

Available at all times from my Home Screen 2.0 is a new search tool that's able to look for content based on your search keywords across all available source options, including Internet video services, websites and any external devices you may have connected to your TV.

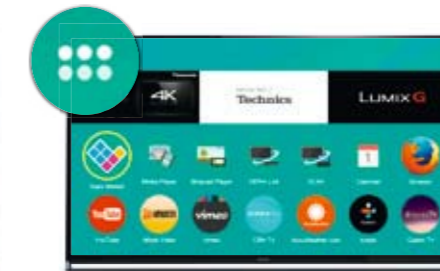

Smarter Remote Control

Several 2015 Panasonic TVs come with a newly designed 'smart' Remote Control that features a more intuitively shaped and spacious Touch Pad area along with a new 'Pin to Home' button, which you can use to personalise your my Home Screen 2.0 interface.

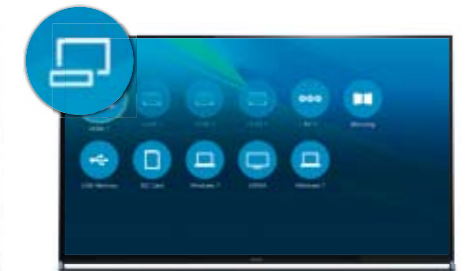

The Live TV Deck

From here, you can select live broadcasts to watch from an electronic programme guide, or you can use the deck to build up your own 'Home Screen' of most-watched channels.

The Apps Deck

This deck gives you slick, graphically rich access to the wide and varied range of apps available through Panasonic's smart platform. These apps take in everything from exciting games to the most popular localised video on demand partners and many other services besides.

The Devices Deck

Any devices connected to your TV by either cables or Wi-Fi will appear in this deck, giving you rapid access to external sources like tablets, smartphones, computers, Blu-ray players, SD cards, USB storage drives and headphones.

TV EVERYWHERE

Thanks to Panasonic, you can now enjoy your favourite TV shows in every room of your house – and anywhere in the world!

A whole new way of watching TV
In its ongoing bid to rid your home of cables, Panasonic has used its home networking expertise to allow its 2015 TVs to share their pictures wirelessly between each other, rather than each TV needing its own cabled aerial input.

IN-HOUSE TV STREAMING

SET YOUR TV FREE

What it does

The days where you had to position every TV in your home next to an aerial, satellite or cable socket are finally over. The new Panasonic In-house TV feature means you can now simply stream broadcasts from a single main (server) TV to multiple second-room (client) TVs, tablets or smartphones.

Twin HD Tuner advantage

Since your main server TV is equipped with two tuners, you can watch one TV show on the main TV while someone else watches a different programme on a second TV (Client).

How it works

The server TV converts broadcasts into signals that can be sent via your router to any compatible client devices – TVs, tablets or smartphones – that share your home network.

TV ANYWHERE

Television on the go

If you've ever found yourself sitting on a train or in a café or hotel room wishing you could watch something on your TV at home, the TV Anywhere feature found on many 2015 Panasonic TVs is a dream come true. It lets you access your TV's tuners or USB recordings over the Internet using your tablet or smartphone and the new Panasonic Media Center App – Free Download available for iOS and Android devices. (From April 2015)

Two-way street

You can also use TV Anywhere to remotely set recordings on your TV from your smartphone or tablet.

Never miss another show
Kitchens, bedrooms, studies, living rooms... Thanks to the new Panasonic In-house TV Streaming technology, it's much easier to watch TV in any or every room of your home.

SEAMLESS INTERACTIVITY

Cutting edge processing and innovative new smart features make the new generation of Panasonic TVs so much more than just TVs.

QUAD-CORE PRO

EXPAND YOUR TV'S MIND

A new way of thinking

With so many applications and features to handle, today's Smart TVs need some serious brainpower to make sure they can still deliver a slick, sophisticated user experience. Cue the new Panasonic Quad-Core Pro chip, which uses its ultra-powerful processing to keep the my Home Screen 2.0 interface running slickly, quickly and efficiently, despite its sophisticated features and graphics-rich design.

Do more, faster

Panasonic Quad-Core Pro TVs can run multiple apps and web pages simultaneously without slowing down, allowing users to easily switch between them for a truly fluid, immersive, smart environment.

Voice Assistant Pro

Twin HD Tuners

Swipe and Share

SMART FEATURES

Info Frame

Say hello to your new personal TV assistant. The new Panasonic Info Frame feature combines on a single screen everything from local weather reports to recommended TV shows, TV listings and links to favourite websites. Just switch your TV on and the Info Frame appears, giving you instant access to the information or content you need in just seconds.

my Stream

my Stream recommends TV broadcasts, video on demand services and Internet content it knows from experience that you'll like, presenting the results in an inviting, graphically-rich scrolling interface. You can also now see the results of keyword searches in the my Stream format.

Voice Assistant Pro

Thanks to the new Voice Assistant Pro feature, you no longer have to speak into a mic on the remote control to make your Panasonic TV 'hear you'. You can now speak directly to the TV - which means you can still control it even if you've lost the remote down the back of the sofa.

Smarter Remote Control

The new 'Pin to home' Button makes it easier than ever to customise your Smart TV experience by letting you instantly pin favourite apps or TV channels to your personal my Home Screen 2.0 page. A new, larger touch pad offers a faster and intuitive way to move around smart menus and web pages.

Twin HD Tuners

Panasonic TVs with two tuners open up a wealth of great extra features. You can watch one programme while recording another. You can watch one broadcast on your TV while someone else watches another on their smartphone or tablet. You can watch two programmes simultaneously on the TV screen, or you can keep watching TV while browsing what's showing on other channels via a small second window in the electronic programme guide.

Swipe and Share

Sharing content between your TV and your smart devices over your home network has never been easier. Download the Panasonic TV Remote app from the iOS App market or Google Play store and you'll be able to 'throw' content from your smart device to your TV just by swiping up your smart device's screen, or 'pull' content from the TV to your smart device simply by swiping your smart device's screen towards you.

PERFECT HARMONY

With their clean, minimalistic lines and simple, authentic style, the latest Panasonic TVs bring the best out of any living room design.

DESIGNED FOR LIFE

ELEGANTLY UNDERSTATED

Interior elements

Sometimes a whisper speaks louder than a shout. The latest range of TVs from Panasonic feature a beautifully subtle combination of minimalist, barely-there frames and stylishly understated colour combinations to produce an elegantly refined appearance that effortlessly complements any room, whatever your style.

Material benefits

Panasonic TVs use high-grade materials, including metallics, to give them a luxurious, premium look and feel.

HEADPHONES

ALL YOUR MUSIC IN ALL YOUR ROOMS

The latest Panasonic Smart Wireless Audio Systems let you enjoy music from limitless choices anywhere in your home.

ALL SPEAKER SERIES

ANY SOURCE IN, GREAT SOUND OUT

Sound everywhere

You no longer have to be in the same room as your hi-fi or TV to listen to movie soundtracks and music.

The latest Panasonic ALL Series draw on Qualcomm ALLPlay technology to create a wireless network of high-performance speakers able to send pretty much any sound source to any room in your house without difficult and messy cable connections.

Party-Mode and Multi-Zone support

You can either listen to the same music in every room where you've got an ALL Speaker (Party-Mode) or you can listen to different music on each individual ALL Speaker (Multi-Zone Mode).

Exceptional versatility

The latest ALL Series Speakers can play your music in stunning quality from an incredible diversity of music sources, ranging from tablets, smartphones, PCs, networked hard drives, and online music streaming services to CDs, radio channels, TVs and Bluetooth®-enabled products. What's more, you can even send the sound from all these potential sources to further ALL Speakers anywhere in your home.

High-resolution music

The ALL Series can now provide CD-beating sound quality, courtesy of the PMX100's support of the FLAC high-resolution music format.

1. Stream sound files or video's audio content from your smart device

Watching music videos on video-sharing platforms on your tablet but want the sound to have much better quality than your portable device can deliver? Simply connect your tablet to your nearest ALL Speaker by Bluetooth®. Then, you could even forward your music to a separate ALL Speaker in another room.

2. Enjoy your CDs via multiple speakers

You want to listen to CDs upstairs, but your CD system and beloved CD collection are stored in your living room downstairs? With the Panasonic ALL5CD or PMX100, you can listen to your CDs and re-stream them 'live' and direct to all other ALL Speakers located in your house. There's no need to rip them to a PC or network hard drive first.

3. Set your TV sound free

There's a live concert on the TV in the living room, but you've got to cook in the kitchen. With the ALL70T soundbar you can stream the sound from your TV to an ALL Series Speaker in the kitchen. Another great TV sound feature lets you configure, for instance, ALL2 Speakers to work as rear or stereo speakers to accompany an ALL30T Speakerboard or ALL70T soundbar.

4. Listen to your favourite radio station anywhere in your home

You're listening to your favourite radio channel on a PMX100 in your study, but your partner wants to hear it in the living room, too? With no loss of quality you can send radio broadcasts directly to, say, an ALL2, ALL3 or ALL8 Speaker in your living room.

MUSIC STREAMING MADE SIMPLE

As well as being easy to set up, the Panasonic Music Streaming App integrates seamlessly with a wealth of music partners.

Enjoy all the original features of music subscription services

You can access a wealth of subscription services from within the Panasonic Music Streaming App. Even better, the Panasonic Music Streaming App lets you use the native app menus of radio or music subscription services to ensure full functionality with each third-party platform.

ALLPlay Radio powered by tunein
Audio streaming platform developed to make it easier for ALLPlay-equipped multimedia devices to share files with each other.

Spotify
A digital music service with free and subscription options providing access to millions of songs.

napster
Subscription-based music service offering more than 25 million songs for streaming or download.

AUPEO!
An Internet radio service that can create personalised radio stations. Free and subscription tiers available.

AND MORE

Adding ALLPlay Speakers to your Home Network

- Step 1:** Turn on your speaker, go to your smart device's Settings and look for the name of the speaker in your Wi-Fi list.
- Step 2:** Choose the ALLPlay speaker on the Wi-Fi list and give it a name. For example, Living Room, Kitchen, Study.
- Step 3:** Choose the wireless network you want to add the speaker to and input that network's password, if required.
- Step 4:** Pair or group your speakers to create the perfect sound in your home.

Fine tune your sound

You can now tweak the sound from all your ALL Series models to suit your tastes with a new Equalizer feature that lets you adjust the bass and treble levels independently for every speaker in your system.

SIMPLE SET UP

ADD SERVICES AND SPEAKERS IN SECONDS

Convenient Set-Up

If your router supports WPS, you can literally set up a wireless ALL Series speaker system at the press of a button.

Panasonic Music Streaming App

The new version of this app makes it even easier to take control of your whole ALL Series system and enjoy seamless access to numerous third-party music services. See our annotated guides to see just how easy it is to enjoy music wirelessly all around your home.

KEY ALL TECHNOLOGY: VERSATILITY MEETS SOUND QUALITY CD and radio streaming

The 2015 Panasonic ALL5CD and PMX100 can convert CDs and FM/digital radio channels into streamable data in real time, so you can enjoy them live on ALL Speakers in other rooms with no need for an intermediary PC.

Premium speaker design

The new ALL2 model features an 80 mm full-range speaker with an audiophile design that lets it produce excellent bass and detail while keeping a compact design. The ALL5CD, meanwhile, features speakers with ultra-soft diaphragms to permit greater and more fluid movement, as well as a design that cancels distortion-causing internal vibrations.

LincsD-Amp technology

The ALL5CD features a new generation of the Panasonic LincsD-Amp technology. This does a better job than ever before of correcting jitter and power supply noise that can reduce the quality of digital music playback.

THE ALL SERIES: WELCOME TO THE AUDIO REVOLUTION

TENTATIVE

ALL2

SMART WIRELESS SPEAKER FOR MUSIC THROUGHOUT THE HOME

ALLPlay Wireless Speaker – use as stereo or surround sound system with other ALL Speakers to enhance your TV's audio
Easy to use – customise six one-touch buttons with your favourite programmes and Internet radio stations

Comfortable fit – new ear piece and long audio port offer superior noise isolation

HEADPHONES

THE BEAUTY IS IN THE DETAIL

The latest Panasonic Blu-ray family adds a new world of Ultra HD quality to its acclaimed convenience features.

SPECTACULAR PICTURES AND SOUND

4K Upscaling

The AV world is buzzing right now with talk of 4K Ultra HD: a picture resolution that provides four times as many pixels of video information as the usual HD format to give you pictures with much more detail, texture, clarity and depth.

With 4K Ultra HD televisions already widely available (see the TV section of this brochure for details on the new Panasonic 4K UHD TV collection), Panasonic has drawn on its decades of video processing experience to build high quality 4K upscaling systems into its latest

Blu-ray recorders. This means you can now enjoy beautiful 4K images from both your Blu-ray collection and your own home movies.

High-Resolution Audio

The high-quality audio formats FLAC, WMA and WAV can all be played by Panasonic Blu-ray recorders. In addition, the recorders feature a Pure Sound Mode which can be used when listening to music to stop all mechanical activity in the HDD and tuner areas – as well as minimise cooling fan movement – to enhance sound quality.

BLU-RAY RECORDER FEATURES

TV Anywhere

Many of the latest Panasonic Blu-ray recorders can send recordings and live TV broadcasts over the Internet to your smartphone or tablet no matter where in the world you are. All you need is a network connection.

Remote Recording

Many Panasonic Blu-ray recorders let you set up recordings using your smartphone, tablet or PC. This means you can browse channel listings

and select shows to record on your second screen without interrupting your main TV viewing. What's more, if you download the DIGA Player App you can set up recordings even when you're away from home!

Keyword Recording

This feature makes setting up recordings easier by letting you simply input favourite keywords. For instance, type in 'Football' and your DIGA recorder will search through the TV listings and automatically record any related programmes.

MULTI-TALENTED RECORDERS

ICON GLOSSARY 2015

VIERA LED TVs

TECHNOLOGY

4K **4K ULTRA HD Pro:** Professional-grade picture technology, the new 4K Studio Master Processor is based on unrivalled Panasonic picture processing know-how. It has been engineered to deliver the best possible picture quality, true to the director's intentions. Together with Wide Colour Phosphor technology, it ensures VIERA TVs reproduce accurate colours, fine blacks and brilliant brightness.

ULTRA HD **ULTRA HD:** The Ultra HD (UHD) logo is the official industry logo developed by DIGITAL EUROPE. TVs featuring this official logo must meet UHD requirements, like all 4K UHD VIERA TVs. They are proven to provide true Ultra HD picture quality and connectivity in line with the high standards.

VIERA **VIERA:** The name for the Panasonic range of high-quality TVs, VIERA is known around the world for amazing picture quality and easy-to-use features that make your home entertainment experience better than ever.

4K ULTRA HD UPSCALING **4K Ultra HD Upscaling:** This digital video format boosts conventional Full HD media to the next generation of TV resolution, which is four times higher than Full HD – delivering breathtaking image and sound quality.

FULL HD **Full HD:** Full High Definition (HD) offers an amazing resolution of 1,920 x 1,080 – in contrast, PAL offers 720 x 576 and NTSC 720 x 480. This means you can enjoy Full HD programmes and films with sharp, dynamic images and brilliant colour.

LED **LED:** VIERA panel featuring LED backlight technology and a slim chassis with narrow bezel. The panel provides excellent motion picture quality while consuming less energy, complemented by a design that delivers style to any interior.

IPS LED **IPS LED:** Panasonic LED panels employ the latest liquid crystal material, with higher light output and a highly efficient LED backlight – resulting in super low-power consumption without compromising picture quality or features.

PICTURE QUALITY

4K PURE DIRECT **4K Pure Direct:** During 4K signal transmission to the TV via HDMI, colour information is slightly compromised, resulting in less-than-ideal colour shading and gradation. With 4K Pure Direct, all colour information and full resolution is transmitted to the TV, so that the picture retains its crisp, rich colours as intended in 4K Ultra HD.

THX 4K DISPLAY **THX 4K Display:** With VIERA panels featuring THX 4K Display, you can be sure of experiencing the original image quality of a movie just as the filmmakers intended – in spectacular 4K. These VIERA TVs have cleared the high standards for 4K set by the THX® Certified Display Programme.

3D **3D:** If you want to enjoy hassle-free 3D films at home, then Panasonic has the ideal solution for you. Optimal for a high-grade VIERA LED TV featuring 3D rendering, and you'll get brilliant 3D entertainment with HD image quality.

LOCAL DIMMING **Local Dimming:** To ensure robust blacks and delicate gradation with any film genre, a range of VIERA TVs feature Local Dimming. Rich gradation is achieved by matching the backlight control and optimising the brightness level to each area. This enables deeper black expression and displays even tiny details in dark scenes with crisp clarity.

DYNAMIC RANGE REMASTER **Dynamic Range Remaster:** During film recording, brightness and colour data are compressed. So, you can enjoy the full impact of Hollywood blockbusters or your favourite TV shows, this data is restored during playback, thanks to Dynamic Range Remaster. Colour data is likewise maintained and the contrast is boosted to provide brilliant, vivid images.

ULTIMATE CONTRAST **Ultimate Contrast:** The cutting-edge VIERA AX900 series features Ultimate Contrast, delivering ultra-bright images and impressive black levels. To achieve this, it combines innovative direct LED backlight technology with local dimming and intelligent rendering drivers.

SUPREME CONTRAST **Supreme Contrast:** Several high-end VIERA TVs feature Supreme Contrast, which delivers spectacular levels of deep black with bright, crisp images. It does this by combining cutting-edge Panasonic panel technology with innovative LED backlight featuring Local Dimming.

BRILLIANT CONTRAST **Brilliant Contrast:** To give you great contrast with bright images, deep black levels and low power consumption, many VIERA TVs feature Brilliant Contrast. It combines innovative panel and LED backlight technologies for an immersive home cinema viewing experience.

HIGH CONTRAST **High Contrast:** VIERA TVs with High Contrast deliver a genuine home cinema atmosphere. Deep blacks and bright whites make for more dynamic images, with great colour and crisp picture quality.

SUPER BRIGHT PANEL **Super Bright Panel:** Even when the sunlight is fully shining through your living room window, you will enjoy a clear picture on your VIERA TV screen, featuring Super Bright Panel technology. This high-transmittance panel combines with a high-efficiency LED backlight to produce sharp, crisp images. VIERA TVs with Bright Panel Plus also ensure clear viewing in sunlit rooms.

4K STUDIO MASTER PROCESSOR **4K Studio Master Processor:** To boost your viewing experience, selected 4K Ultra HD VIERA TVs also feature advanced Studio Master 4K Processor. It delivers a stunningly accurate picture, just as the director intended – with ultra-fine colour rendering and smooth gradations also for upscaled films.

4K STUDIO MASTER DRIVE **4K Studio Master Drive:** To seamlessly complement your 4K viewing experience, several 4K Ultra HD VIERA TVs also feature 4K Studio Master Drive. It enhances picture processing and delivers accurate colour expression for an outstanding viewing experience.

STUDIO MASTER COLOUR **Studio Master Colour:** Experience more vivid viewing, thanks to amazing colour gradations and brightness. It's possible with Studio Master Colour. The high-colour-space LED panel construction reproduces colours faithful to the original, for vividly colourful images from a wide colour gamut.

3000 Hz **Up to 3,000Hz BLS 4K IFC:** Enjoy extremely smooth fast motion images thanks to the high-speed panel and the Intelligent Frame Creation paired with the advanced backlight scanning technology.

1600 Hz **Up to 1,600Hz BLS 4K IFC:** This motion engine combines a powerful panel and Intelligent Frame Creation interpolation processing with backlight scanning to deliver cleaner, smoother and sharper 4K Ultra HD pictures from any source.

200 Hz **Up to 200Hz BMR 4K:** 4K UHD VIERA TVs featuring 200Hz (BMR) motion technology ensure that your favourite films, games and TV programmes boast great motion sharpness for clear moving images.

400 Hz **Up to 400Hz BMR IFC:** With a VIERA TV featuring up to 400Hz (BMR) Intelligent Frame Creation (IFC), you are assured of smooth, jitter-free reproduction of fast motion images. This drive technology combines advanced backlight technology with enhanced, high-speed drive performance to provide outstanding sports or action movies.

400 Hz **Up to 400Hz RMR:** For any room and any space, there is a high-quality VIERA TV to match. The models with up to 400Hz (RMR) deliver smooth motion quality for a great viewing experience with every TV show or film.

EASY OPERATION

4K SWIPE & SHARE **4K Swipe & Share:** This free, updated iOS/Android Panasonic TV Remote 2 App lets you share photos stored on a compatible mobile device in Full 4K resolution by 'swiping' them towards the TV.

SWIPE & SHARE **Swipe & Share:** Unleash the full potential of your smartphone with the Panasonic TV Remote 2 App and Swipe & Share functions. Share and stream personal content, like pictures, movies and music to your VIERA TV simply from Android™ or Apple-based smartphones.

my Stream **my Stream:** A wide variety of media – TV shows, video on demand and Internet content – is automatically recommended to you by this intuitive interface. You can also perform keyword searches for faster access.

INFO FRAME **Info Frame:** When you turn on your TV, Info Frame appears – combining local weather reports, recommended TV shows, your favourite website links and more on one single, convenient screen.

IN-HOUSE TV STREAMING **In-house TV Streaming Server & Client:** You now have the freedom to position your VIERA TV anywhere in your home. Simply wirelessly stream broadcasts from a main TV, which acts as a server, to any other TVs, tablets or smartphones in any room.

QUAD-CORE PRO **Quad-Core Pro:** This ultra-powerful processor lets you enjoy smart VIERA features at high speed with smooth interaction. Quad-Core Pro is extra efficient, as the picture is processed separately from the features. So, you can easily switch between multiple apps and Web pages seamlessly without any lag time.

QUAD-CORE **Quad-Core:** The high-speed Quad-Core central processing unit (CPU) leverages a total of four processing cores to deliver a great VIERA experience. You'll not only notice smooth images – you'll also become immersed in the on-screen action.

DUAL-CORE x4 **Dual-Core x4:** The Dual-Core x4 central processing unit (CPU) ensures the VIERA TV panel reproduces great picture quality and is equipped to handle smart features, with seamless functionality. It consists of two cores with four processing units each, ensuring high speed, accuracy and precision.

SMART NETWORKING

Web Browser **Web Browser:** The Web Browser lets you easily browse the Internet on the TV and enjoy user-friendly features. On VIERA 4K TVs, you can also enjoy online content in Ultra HD 4K resolution, perfect for viewing maps on screen. High-end VIERA TVs now use the popular Firefox interface.

TWIN HD TUNER **Twin HD Tuner:** With the Twin HD Tuner – either for satellite, cable or antenna hook-up – you can watch a TV show and zap at the same time: watch one show while recording another, or swipe the show to your tablet and watch something else on the TV.

MEDIA PLAYER **Media Player:** The renowned Media Player is now available with VIERA 4K Ultra HD TVs. It lets you easily enjoy your personal multimedia entertainment stored on any USB memory device.

Bluetooth **Bluetooth®:** Bluetooth® is a wireless technology standard for exchanging data over short distances from fixed and mobile devices. This means you can connect any Panasonic Bluetooth®-enabled product with other Bluetooth®-enabled devices without the cable clutter – and in high quality.

EASY MIRRORING **Easy Mirroring:** Transfer photos, videos and more from your smartphone, tablet or computer display straight to the large VIERA TV screen. Built-in Wi-Fi capability lets you easily and quickly connect your Android-based® mobile devices to the TV.

(*Ver. 4.2 and above and Miracast™ certified)

my Home Screen **my Home Screen:** With the Panasonic my Home Screen feature, you can customise the start-up screen of your VIERA TV to suit your personal style and needs. Quickly access your favourite apps and functionalities – my Home Screen gives you an easy overview at a glance.

my Home Screen 2.0 **my Home Screen 2.0:** With this app, it is easy and fun to share – simply swap multimedia or websites from your smartphone's display to the TV screen and vice versa. This newly enhanced VIERA app goes a step further, letting you swipe and store your media from your smartphone to the TV.

TOUCH PAD REMOTE **Touch Pad Remote:** Several new VIERA TVs come with a smart Touch Pad Remote. Intuitively shaped with a spacious touch pad, it lets you pin your favourite apps and channels to your my Home Screen 2.0 with a touch of the 'my' button.

VOICE ASSISTANT PRO **Voice Assistant Pro:** With Voice Assistant Pro, voice operation is virtually just like talking. It enables you to easily speak out keyword searches and even control the TV, too – without the need to speak into the remote control.

VOICE GUIDANCE **Voice Guidance:** VIERA TVs with Voice Guidance will verbally inform you of programme information, recording and other settings, and more with clear pronunciation and tone. It provides easy-to-understand operating procedures for people with impaired vision or elderly people.

CONTENT OPTIMIZER PRO **Content Optimizer Pro:** So you have beautiful pictures from virtually any source, VIERA TVs employ Content Optimizer. This high-performance engine leverages any number of enhancement features – refining a variety of images, broadcasts and websites, as well as virtually all kinds of sources to provide excellent picture quality.

TV ANYWHERE **TV Anywhere:** Enjoy your favourite multimedia content wherever you are. The VIERA TV streams live broadcasts or recorded content stored on a USB HDD to your mobile device.

4K 50/60p INPUT **4K 50/60p Input:** Based on HDMI 2.0, this input terminal accepts super-high-resolution 4K signals in outstanding high quality, with a higher frame rate capability.

INTERNET APPS **Internet Apps:** Cloud-based, the new Internet Apps functionality gives you instant and easy access to the Internet, as well as a wide range of apps, Video on Demand services, games and more.

ESSENTIAL APPS **Essential Apps:** Get started with TV apps. Easily access dedicated apps, online entertainment and more directly on your big-screen VIERA TV, from the comfort of your living room sofa.

WIRELESS LAN BUILT-IN **Wireless LAN built-in:** Many VIERA TVs can be wirelessly connected to your home network. So you can take advantage of Internet Apps and DLNA networking throughout your home.

USB HDD RECORDING **USB HDD Recording:** Thanks to this function, available with many new cutting-edge VIERA TVs, you can hook up an external USB hard disc to record TV shows or films in excellent quality. It also supports Timer Recording, Direct TV Recording and Pause Live TV.

DLNA **DLNA:** Access videos, pictures and music stored in other rooms and enjoy content throughout the home by connecting compatible devices via DLNA. The Panasonic TV Remote 2 App lets you transfer content from your iPhone/Android™ tablet or smartphone to your TV, or access your DLNA server from mobile devices.

ICON GLOSSARY 2015 AUDIO AND VIDEO

TECHNOLOGY

4K JPEG Playback: 4K JPEG Playback is essential for enjoying personal images on a large 4K screen in ultra-high 4K quality.

Blu-ray 3D: Enjoy your favourite blockbusters in stunning 3D at home. Full HD 3D Blu-ray Disc™ Playback brilliantly reproduces images that leap off the screen, with enhanced depth, lustre and texture.

4K Ultra HD Upscaling: This digital video format boosts conventional Full HD media to the next generation of TV resolution, which is four times higher than Full HD – delivering breathtaking image and sound quality.

Qualcomm® ALLPlay™: A smart media platform that enables seamless streaming of high-quality local and Cloud-based content – via high-performance Wi-Fi connectivity – across multiple product brands and platforms.

SMART NETWORKING

Wi-Fi Built-in: Many Panasonic video products can be wirelessly connected to your home network. So, you can take advantage of Internet Apps and DLNA networking throughout your home.

Web Browser: As the name implies, the Web Browser lets you easily browse the Internet on the TV and enjoy user-friendly features. And with Web Browser 4K, you can enjoy online content in high 4K resolution, perfect for viewing maps on screen.

Panasonic Music Streaming App: Available for all models that feature Bluetooth®, AirPlay or DLNA, this app controls wireless music streaming from any device, be it smartphone, tablet or PC, and recognises compatible wireless speakers.

AirPlay®: Developed by Apple especially for Apple devices, AirPlay technology lets you stream your favourite music wirelessly from your iPhone, iPad and iPod Touch directly to AirPlay-enabled devices on the same Wi-Fi network.

Miracast™: This functionality uses Wi-Fi Direct technology to transfer content from a Wi-Fi device for playing back on a TV – even without a Wi-Fi access point.

NFC™ (Near Field Communication): Enables easy pairing of the NFC-capable speaker and smartphone via Bluetooth® – at a single touch of the smart device – making troublesome settings a thing of the past.

Twin HDMI: With Twin HDMI, one signal output is exclusively dedicated to audio, so that your home cinema media sounds incredible.

Wi-Fi Certified: Panasonic products that are Wi-Fi Certified have been specially certified by the Wi-Fi Alliance for their ability to wirelessly connect to your home network.

Internet Apps: Cloud-based, the new Internet Apps functionality gives you instant and easy access to the Internet as well as a wide range of apps, Video on Demand services, games and more.

Bluetooth®: Bluetooth® is a wireless technology standard for exchanging data over short distances from fixed and mobile devices. This means you can connect any Panasonic Bluetooth®-enabled product with other Bluetooth®-enabled devices without the cable clutter – and in high quality.

DLNA: Access videos, pictures and music stored in other rooms and enjoy content throughout the home by connecting compatible devices via DLNA. The Panasonic TV Remote 2 App lets you transfer content from your iPhone/ Android™ tablet or smartphone to your TV, or access your DLNA server from mobile devices.

HIGH-QUALITY SOUND

FLAC: FLAC stands for Free Lossless Audio Codec and is a High Definition audio compression technology without any loss in quality. Panasonic products with FLAC compatibility enable you to listen to compressed music files without compromising on high audio quality.

LincsD-Amp™: Based on MASH noise-shaping technology, LincsD-Amp™ markedly reduces jitter and sound distortion that can affect audio clarity – producing pure, brilliant sound.

THX Certified: The THX Certified Panasonic Blu-ray Disc Player reproduces pictures and sounds with the same detail and clarity as found in the filmmakers studio.

XBS Master: Short for Extra Bass System, XBS Master is a unique Panasonic, high-quality sound technology for even more powerful bass sound without distortion.

aptX®: Developed for video content and gaming, aptX Low Latency provides seamless audio-video synchronisation when transmitted via Bluetooth® A2DP, offering a latency time of 32 milliseconds.

Clear-mode Dialog: Gives sound greater depth and makes voices sound like they're coming from the centre of the screen. The dialogue volume is adjustable to four levels, which is great for hearing clear dialogue over the surround sound.

High Res Sound: A clear listening experience is yours with High Res Sound, available for Panasonic audio products which support a playback frequency range of at least 48kHz.
